ANNEX I – COMPLAINTS

1.1. INSURANCE

For the 2023 Consumer Trends Report, EIOPA adopted the same approach towards the collection of complaints data it did in 2021, 2022.

- ▶ To increase data comparability it differentiated between data on complaints received and managed by insurance undertakings and data on complaints received by entities other than insurance undertakings. These in most instances include Ombudsmen, or similar alternative dispute resolution bodies, and/or NCAs which either handle complaints and/or receive complaints and take supervisory actions as needed in line with their collective consumer protection mandate;
- ▶ To collect more granular data on products by closely matching the data requested with the data available at NCAs, for those NCAs which provided data on complaints received and managed by insurance undertakings, it differentiated between complaints reported by products and complaints reported by insurance classes.

1.2. PENSION

Similarly than for the insurance sector, EIOPA collects data on pensions complaints from two sources:

- ▶ Complaints received and managed by pension providers.
- ▶ Those collected by entities acting like a mediating body and/or ADR.

EIOPA(2023)0112360

ANNEX II – NCAS SUPERVISORY ACTIVITIES

2.1. INSURANCE

EIOPA requests input yearly to NCAs on their top 5 insurance conduct-related supervisory activities, and more particularly on the types of products concerned by these activities, on the area of these activities and on the type of activities.

Figure 8 – Number of supervisory activities carried out by NCAs in relation to insurance products- 2022⁶

Source: EIOPA’s Committee on Consumer Protection and Financial Innovation in 2023⁷

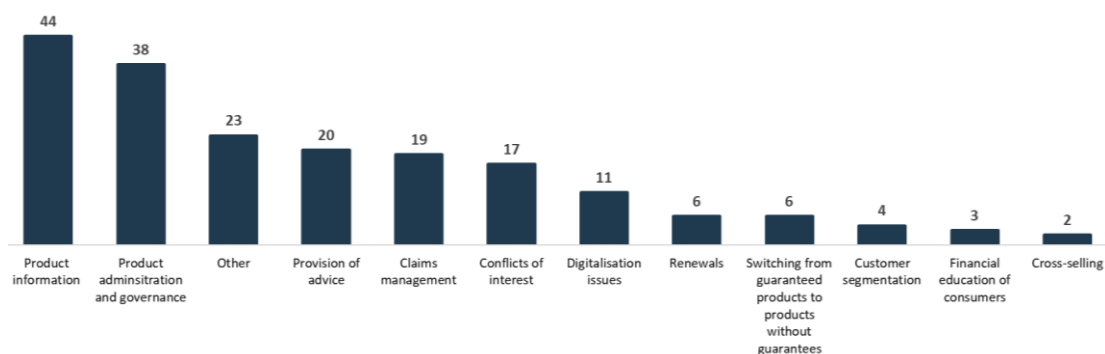

In 2022, NCA reported a total of 99 conduct-related insurance supervisory activities (note: one activity can relate to multiple products, tools used and topics investigated). In terms of products concerned by these activities, life products continue to be priority as 2 life insurance products (unit-linked, with profit) are in the first 3 products (Figure 8), similarly to last year’s reporting. This is also confirmed by the fact that 13 supervisory activities exclusively related to unit linked products, marking their importance in NCAs’ conduct supervision (Figure 8). In terms of non-life products, NCAs’ activities focus is distributed, with particular attention on household insurance, accident and health insurance and motor third party liability.

⁶ Supervisory activities reported by NCAs relate to one or more products. Hence this graph shows in white dotted bar the supervisory activities which only related to one product, and in a blue bar supervisory activities which relate to that product but also to other products.

⁷ 27 NCAs respondents: AT, BE, BG, CZ, DE, DK, EE, EL, ES, FI, FR, HR, HU, IE, IT, LI, LT, LU, LV, MT, NL, PL, PT, RO, SE, SI, SK

EIOPA(2023)0112360

 EIOPA-BoS-23/471

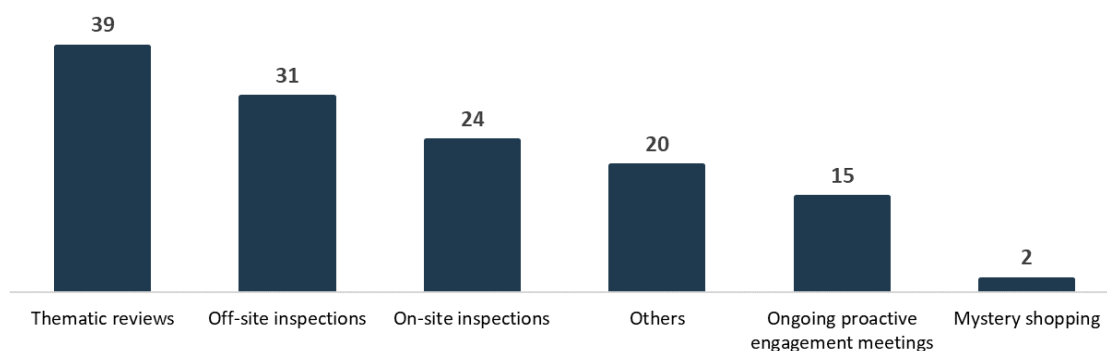

Figure 9 – Number of insurance supervisory activities carried out by NCAs in relation to their area of focus – 2022

Source: EIOPA’s Committee on Consumer Protection and Financial Innovation in 2023⁸

In terms of the areas tackled by NCAs top 5 supervisory activities (Figure 9), the majority of NCAs activities focused on product-related areas such as product information (44 activities) and product administration and governance (38 activities), similarly to last year. NCAs also conducted activities in relation to the provision of advice (20 activities).

Figure 10 – Number of NCAs’ insurance-related supervisory activities by type of tool used – 2022

Source: EIOPA’s Committee on Consumer Protection and Financial Innovation in 2023⁹

In relation to the tools used in their top 5 supervisory activities, NCAs have in large part conducted thematic reviews (39 activities), closely followed by off-site (31 activities) and on-site (24 activities) inspections. NCAs also reported engagement meetings (15 activities), as well as 2 mystery shopping exercises (Figure 10).

2.2. PENSION

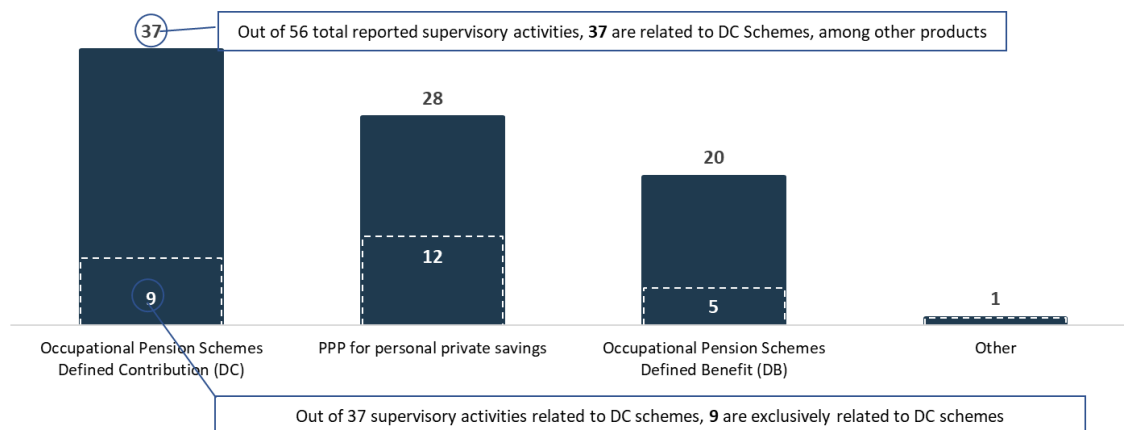

⁸ 27 NCAs respondents: AT, BE, BG, CZ, DE, DK, EE, EL, ES, FI, FR, HR, HU, IE, IT, LI, LT, LU, LV, MT, NL, PL, PT, RO, SE, SI, SK

⁹ 27 NCAs respondents: AT, BE, BG, CZ, DE, DK, EE, EL, ES, FI, FR, HR, HU, IE, IT, LI, LT, LU, LV, MT, NL, PL, PT, RO, SE, SI, SK

EIOPA(2023)0112360
 EIOPA REGULAR USE
 EIOPA-BoS-23/471

Similarly than for insurance, EIOPA requests input yearly to NCAs on their top 5 pension conduct-related supervisory activities, and more particularly on the types of products/schemes concerned by these activities, on the area of these activities and on the type of activities.

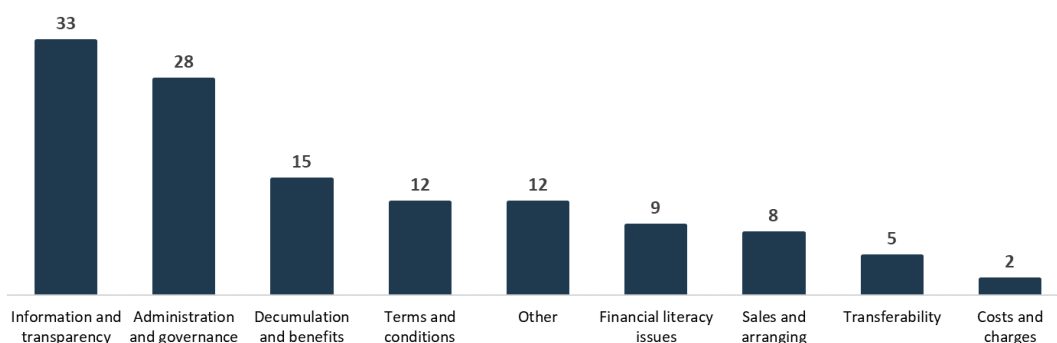

Figure 11 – Number of supervisory activities carried out by NCAs in relation to pension products/schemes - 2022¹⁰

Source: EIOPA’s Committee on Consumer Protection and Financial Innovation in 2023¹¹

In 2022, NCA reported a total of 56 conduct-related pension supervisory activities (note: one activities can relate to multiple products, tools used and topics investigated). In terms of products/schemes concerned by these activities, occupational pension schemes are a priority with 37 supervisory activities conducted on defined contribution schemes and 20 supervisory activities conducted on defined benefit schemes. 28 activities were also reported for personal pension products for personal savings (PPPs).

Figure 12 – Number of pension supervisory activities carried out by NCAs in relation to their area of focus – 2022

¹⁰ Supervisory activities reported by NCAs relate to one or more products. Hence this graph shows in white dotted bar the supervisory activities which only related to one product, and in a blue bar supervisory activities which relate to that product but also to other products.

¹¹ 25 NCAs respondents: AT, BE, BG, CZ, DE, DK, EE, ES, FI, FR, HR, HU, IE, IT, LI, LT, LU, LV, MT, NL, PL, PT, RO, SI, SK

 EIOPA-BoS-23/471

Source: EIOPA’s Committee on Consumer Protection and Financial Innovation in 2023¹²

In terms of the areas tackled by NCAs top 5 pension supervisory activities (Figure 12), a large number of NCAs activities focused on administration and governance (28 activities) and on information and transparency (33 activities).

In terms of tools used by NCAs to carry out their activities onsite and offsite inspections are the most common tools, with thematic reviews and engagement meetings coming closely after (Figure 13).

Figure 13 – Number of NCAs’ pension-related supervisory activities by type of tool used - 2022

Source: EIOPA’s Committee on Consumer Protection and Financial Innovation in 2023¹³

¹² 25 NCAs respondents: AT, BE, BG, CZ, DE, DK, EE, ES, FI, FR, HR, HU, IE, IT, LI, LT, LU, LV, MT, NL, PL, PT RO, SI, SK

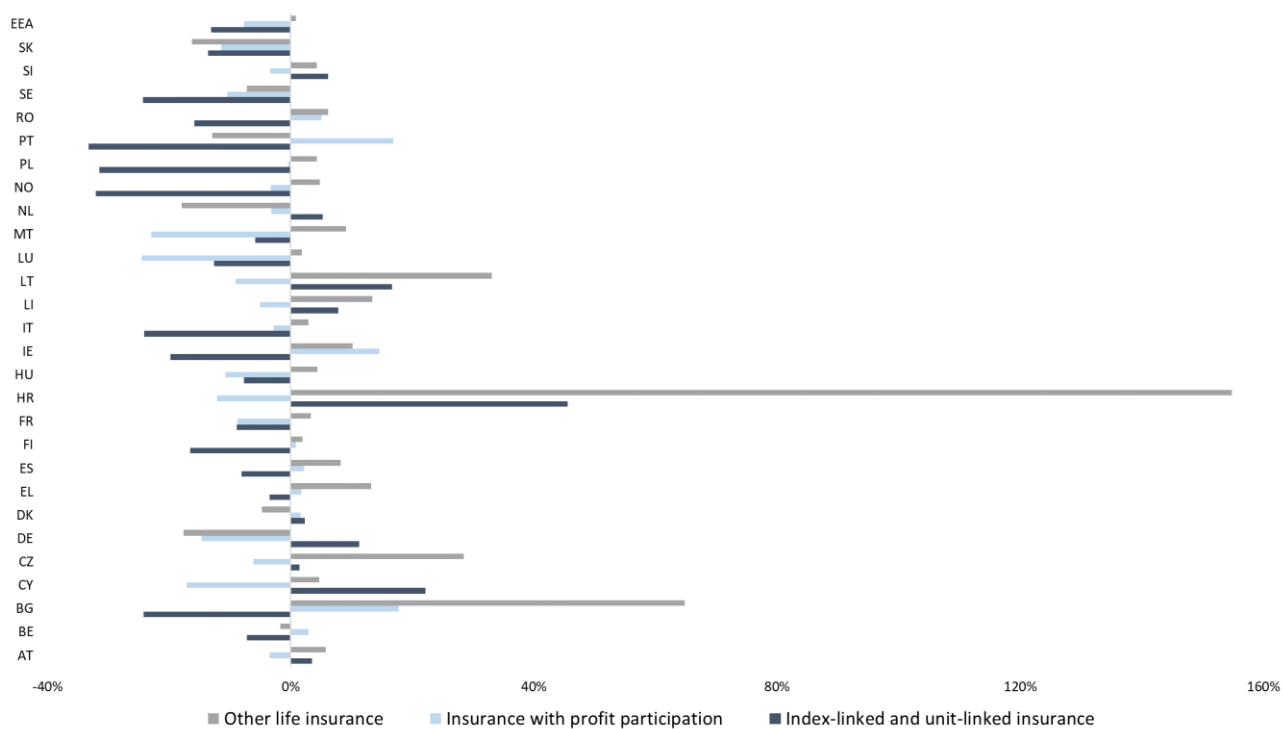

¹³ 25 NCAs respondents: AT, BE, BG, CZ, DE, DK, EE, ES, FI, FR, HR, HU, IE, IT, LI, LT, LU, LV, MT, NL, PL, PT RO, SI, SK

ANNEX III — RETAIL RISK INDICATORS AND INSURANCE LINES OF BUSINESS

In this Annex are reflected graphs based on EIOPA’s Solvency II database and the Retail Risk Indicators methodology¹⁴ that were not included in the main body of the report but that were used to inform its drafting.

SOLVENCY II LINES OF BUSINESS

| Non-life lines of business | Definition ⁽¹⁷⁾ |
|---|--|
| (1) Medical expense insurance | Medical expense insurance obligations where the underlying business is not pursued on a similar technical basis to that of life insurance, other than obligations included in the line of business 3. |
| (2) Income protection insurance | Income protection insurance obligations where the underlying business is not pursued on a similar technical basis to that of life insurance, other than obligations included in the line of business 3. |
| (3) Workers' compensation insurance | Health insurance obligations which relate to accidents at work, industrial injury and occupational diseases and where the underlying business is not pursued on a similar technical basis to that of life insurance. |
| (4) Motor vehicle liability insurance | Insurance obligations which cover all liabilities arising out of the use of motor vehicles operating on land (including carrier's liability). |
| (5) Other motor insurance | Insurance obligations which cover all damage to or loss of land vehicles (including railway rolling stock). |
| (7) Fire and other damage to property insurance | Insurance obligations which cover all damage to or loss of property other than those included in the lines of business 5 and 6 due to fire, explosion, natural forces including storm, hail or frost, nuclear energy, land subsidence and any event such as theft. |
| (8) General liability insurance | Insurance obligations which cover all liabilities other than those in the lines of business 4 and 6. |
| (10) Legal expenses insurance | Insurance obligations which cover legal expenses and cost of litigation. |
| (11) Assistance | Insurance obligations which cover assistance for persons who get into difficulties while travelling, while away from home or while away from their habitual residence. |

|---|--|
| (29) Health insurance | Health insurance obligations where the underlying business is pursued on a similar technical basis to that of life insurance, other than those included in line of business 33 |
| (30) Insurance with profit participation | Insurance obligations with profit participation other than obligations included in line of business 33 and 34. |
| (31) Index-linked and unit-linked insurance | Insurance obligations with index-linked and unit-linked benefits other than those included in lines of business 33 and 34. |
| (32) Other life insurance | Other life insurance obligations other than obligations included in lines of business 29 to 31, 33 and 34. |

ANNEX IV — PENSIONS: DEFINITION AND SCOPE

The *Consumer Trends Report* covers both occupational and personal pension plans and products **under the direct supervision of EIOPA Member States** ⁽¹⁸⁾.

However, EIOPA Member States were invited to provide, on a best effort basis, data on every type of **privately managed pension plan, pension product and/or pension provider registered in their respective jurisdictions**, including all insurance products having a clear objective of retirement provision according to inter alia national social and labour law (SLL) and/or fiscal legislation and excluding the ‘Pillar I’ pensions managed by the State or public entities (**Pillar I-bis pensions in countries in central and eastern Europe are also included**). Therefore, all insurance related non-public pension plans/products could be included in principle, irrespective of whether they are occupational or personal. Plans/products that are defined in the legislation but are not yet actually offered to the public (and/or have not yet collected any members) should also be included.

This last approach would align the scope of this exercise, with the exception of the pension schemes that are not under the direct supervision of EIOPA Member States, with that of **EIOPA’s pensions’ database** ⁽¹⁹⁾, being the definitions included therein that are relevant to the present report.

Data sources and data quality

The analysis performed is based on the IOPRs data reporting - 2021 is the second complete reporting year, following the [“Decision on EIOPA’s regular information requests towards NCAs regarding the provision of occupational pension’s information”](#)²⁰. The analysis is complemented with answers obtained through the surveys distributed to Members. The data reported before 2020 was collected by EIOPA from the Members “States on a voluntary basis and the data has a different structure. Efforts were made to reconcile the information comprehensively. This dataset covers IORPs which comply with the European definition of an institution for occupational retirement provision (IORP) and criteria pinpointed in the aforementioned IORP II Directive²¹.

Nevertheless, it does not provide the global picture for the European Occupational Pensions sector, given that other occupational pension schemes can be offered by providers employers other than IORPs.

¹⁸ This would mean that pension plans such as the ‘book reserves’ and pay-as-you-go schemes are out of scope.

EIOPA(2023)0112360

EIOPA REGULAR USE

EIOPA-BoS-23/471

In some jurisdictions, the current number of occupational pension schemes is mainly state funded, and thus, does not qualify as IORPS under EIOPA's remit. In some others, occupational pensions can also be managed by insurance companies, and for countries such as Belgium they even take care of the largest part of the member of an occupational pension.

ANNEX V — OCCUPATIONAL PENSIONS LANDSCAPE – STRUCTURE AND DESIGN, COUNTRY ANALYSIS²²

| Country | Type of providers and plans ²³ | Membership and Freedom of choice on the pension product/plan provider | Taxation |
|---------|---|---|---|
| AT | <ul style="list-style-type: none"> ▪ Pensionskassen ▪ Direct commitments (Direktzusagen) ▪ Direct insurance (Direktversicherung) ▪ - Support funds (Unterstützungskasse) | <ul style="list-style-type: none"> ▪ Voluntary. ▪ Before a pension fund contract can be signed, the employer and the employees have to decide via „Betriebsvereinbarung“ (a contract signed by the representatives of the employees of a certain firm and the firm) or via model contract on the specific contributions and the fulfilment of obligations. ▪ Employers with more than 1000 employees in their firm can establish their own pension fund. | <ul style="list-style-type: none"> ▪ EET treatment²⁴ - principle is just realised for the employers` contributions to the pension funds, not for the contributions of the employees. ▪ Income Tax Act states a premium for contributions paid to a pension fund, an additional pension insurance, and voluntary higher payments to the public pension insurance or a pension investment fund made by an employee of up to EUR 1.000. |
| BE | <ul style="list-style-type: none"> ▪ Instellingen voor bedrijfspensioenvoorziening, or institutions de retraite professionnelle, or institutions for occupational retirement ▪ Group life insurance schemes ▪ Individual pension savings account | <ul style="list-style-type: none"> ▪ Voluntary ▪ There is no obligation for employers to set up supplementary schemes for employees. ▪ If there is a plan in place, employees immediately become members of the plan upon entry into service. | <ul style="list-style-type: none"> ▪ Employer contributions might be tax-deductible under certain circumstances. ▪ Benefits are taxed as incomes, but retirees do receive tax credits. ▪ Favourable tax treatment of lump sums payments. |

²² [Data source: Database of pension plans and products in the EEA](#) and IORPs Repository

²³ Providers and schemes design for occupational pension plans.

²⁴ EET system: A form of taxation of pension plans, whereby contributions are exempt, investment income and capital gains of the pension fund are also exempt and benefits are taxed from personal income taxation.

ANNEX VIII — ADDITIONAL INFORMATION ON PPP³¹

| Country | Definition and Main Features |
|-----------|--|
| AT | <p>PPPs are state-sponsored retirement provision (Prämienbegünstigte Zukunftsvorsorge), a form of pension insurance, under which, upon reaching a defined retirement age, a life-long annuity is paid out. Usually a survivor's provision is also arranged, such that following the death of the insured person an annuity continues to be paid to the insured's widow(er). A particular feature of state sponsored retirement provision is the existence of a capital guarantee and a state premium. The product also has preferential tax treatment, with no insurance tax, no capital yield tax and no income tax being accrued.</p> |
| BE | <p>Under Belgian insurance law, PPPs are insurance pension savings belonging to the 3rd pension pillar. They can be concluded either as unit-linked insurance products, profit participation products or as hybrid products. With the exception of the Belgian Tax Law, there is no specific legal framework for PPPs. The legal framework is the one applicable to all life insurance (i.e. mainly the Law of 4 April 2014 on insurance and the Royal Decree on Life Insurance).</p> |
| BG | <p>PPPs are non-IBIPs – UPF, PPF, VPF. The most common types of PPS are other products different from banking products, UCITs and AIF products. In 2021 the pay-off phase from the UPFs was normatively defined through the transfer of the funds from the individual accounts into payment funds. The payment funds are not categorized as pension funds, and it should be mentioned that in 2021 a total of 12508 individual accounts were transferred to the payment funds, and respectively the same number of contracts for payments has been concluded.</p> |
| CY | <p>There is no particular legislation in place, on national level, regarding the provision of third Pillar personal pensions. There is though, in place and under implementation, on a European level basis, the EU Regulation 2019/1238 on the Pan-European Personal Pension Product (PEPP). Based on the information we have, none of the IORPs, which are under our supervision or the Insurance Companies, which are supervised by the Superintendent of Insurance, are currently offering/marketing any PEPP. Some Life Insurance Companies do offer some IBIPs, which are marketed as Pension Products with the aim of providing a retirement benefit, but they are not pure personal pension products, as they have some other characteristics, like the option to surrender early the policy at any time before reaching normal retirement, which do not comply with the characteristics of pure PPPs.</p> |

³¹ Data source: Committee on Consumer Protection and Financial Innovation – NCAs' Questionnaire (Q1 and Q2) Costs and Past Performance Survey

| | |
|-----------|--|
| CZ | N.A |
| DE | <p>In addition to the IBIPs sold with the aim of providing a retirement benefit, there are also 7 additional personal pension products categories, namely Riester products following Altersvorsorgeverträge-Zertifizierungsgesetz (AltZertG). These are voluntary, individual-based and have a DB feature. They are state subsidized pension products which were introduced in Germany in 2001 and are not insurance specific. They may comprise: classic private pension schemes, bank savings plan, funds-related pension scheme; internal and external investment funds, funds savings plan, direct insurances and pension funds, ‘Wohn-Riester’ (home owner) - a contract of loan to buy or build privately used real estate and cooperative shares. Combinations are also possible. The information provided below refer to the IBIPs sold with the aim of providing retirement benefit.</p> |
| DK | <p>Personal pension products in Denmark are voluntary (pillar III) pension plans based on individual contribution payments. PPPs may be set up in addition to or as an alternative to a mandatory occupational (pillar II) pension scheme. PPPs in Denmark are life insurance products, or, to a lesser degree, pure investment products without an insurance element.</p> <p>PPPs are paid out as life annuities (“livrente”) or in installments (“ratepension”). A third option is an “aldersopsparing”, which may be paid out as a lump sum, life annuity or in installments. Contributions to most PPPs are tax deductible and the benefits taxed upon payout, except for “aldersopsparing” for which contributions are non-deductible and the benefits tax-free. All PPPs in Denmark are subject to special pension taxation rules with a lower taxation on profits compared to regular investment products.</p> |
| EE | <p>A supplementary or a voluntary pension fund is a common fund with the objective to provide unit-holders additional income during their retirement years. Voluntary pension funds are pools of assets established and managed by licensed pension fund managers. They are at large very similar to pillar II funds, but the legislation covering the product is less comprehensive, meaning that the fund managers have a greater flexibility to decide on fees, redemption policies and portfolio allocations. The amount and frequency of contributions as well as their suspension is decided by the investor and the money can be taken out, as a whole or in part, before reaching the retirement age. In addition, pillar III account can be opened for a person below the age of 18, as contributions to the fund are voluntary and can be made by other people, e.g. parents or employers. Employers have no obligation to make contributions, but many opt to do so on behalf of or in addition their employees, often including it in the motivational package offered to the employees. Additionally, employers can create a pension fund that is only for their employees, i.e. occupational retirement pension fund, but this is not a common market practice at the time. Other alternatives are pension insurance with guaranteed interest rate and pension insurance with investment risk.</p> |

| | |
|-----------|---|
| EL | N.A. |
| ES | <p>Pension scheme whose sponsor or sponsors undertakings are a financial institution and the members are natural persons. PPP may only be DC in nature.</p> <p>Main features - DC, voluntary principles (not compulsory), complementary to public pensions, no discrimination, capitalization, irrevocability of contribution, recognition of existing rights and compulsory integration of the pension scheme in a pension fund.</p> |
| FI | N.A. |
| FR | N.A. |
| HU | <p>Voluntary pension funds offer an institutional form for retirement support, introducing additional capital in the market that can support long term investment. Members can join the funds voluntarily on individual basis. Members are the owners of the pension funds. They are supplementary pension products designed to substantially improve the amount of the state pension. In case of PPPs which are also IBIPs, these products are life insurance products where the insurance event is the retirement of the client. Usually tax refund can be claimed, but only after the accumulation phase. These contracts have a separate, dedicated account, where also the tax benefits are credited, and which cannot be surrendered in a flexible way. In case of early surrender the tax benefit has to be paid back entirely (Act CXVII of 1995 on Personal Income Tax).</p> |
| HR | <p>Personal Pension products Pillar III consist of voluntary DC pension arrangements. Regarding personal DC arrangements, these are open-ended pension funds, offered commercially by a pension fund management companies, open to any natural person residing in Croatia. Accounts can also be sponsored by employer contributions.</p> <p>A new legislation that entered into force on January 1st, 2019, brought innovation in terms of retirement age in voluntary pensions, both occupational and personal. The minimum pay-out age is increased and now it is 55 years. It also brought innovations for prospective and current members, in terms of abolishing entrance fees and lowering management fees.</p> |
| IE | <p>There are two forms of personal pension contracts used to save for retirement: Personal Retirement Savings Accounts (PRSAs) and Retirement Annuity Contracts (RACs). PRSAs can also be used by people in pensionable employment who wish to make Additional Voluntary Contributions (AVCs). RACs are used mainly by the unincorporated self-employed, but also to a much lesser extent by employees in non- pensionable employment. There is a third type of retirement contract, Personal Retirement Bonds or ‘buy out bonds’ which are designed only to accept transfers from occupational pension schemes in lieu of maintaining a preserved benefit</p> |

|-----------|---|
| | in the scheme. Generally, individuals can take a tax-free lump sum from a PRB and use the remaining funds to buy an annuity (pension) or invest in an Approved Retirement Fund (ARF). |
| IS | N.A. |
| IT | Pillar III products include “PIPs” (Piani individuali pensionistici di tipo assicurativo) and open pension plans (so called “fondi pensione aperti”) with individual adhesion. PIPs are individual pension plans implemented through life insurance contracts offered by insurance companies; they can be either Page 46/75 in the form of with-profit (traditional policies) or unit-linked policies and they only support personal plans. Open pension funds are promoted by banks, insurance companies, asset management companies. They support both occupational plans (collective adhesion) and personal plans (individual adhesion). In both PIPs and open pension funds the assets of the products are required to be segregated by those of the provider and they do not have legal personality. In Italy individual pension products have a specific legal regime and have the same fiscal treatment of occupational pension funds which is more favorable compared to other financial and insurance products. They have the same rules for adhesions, disclosure and benefits payment of occupational pension funds. Italian individual pension products are not considered IBIPs and are not subject to the PRIIPs regulation |
| LI | Life insurance (classes I and III of Annex II to Directive 2009/138/EC of the European Parliament and of the Council of 25 November 2009 on the taking-up and pursuit of the business of Insurance and Reinsurance (Solvency II)) |
| LT | 3rd pillar pension funds in Lithuania refer to supplementary voluntary pension accumulation with the objective to build reserve for future retirement in addition to social insurance and 2nd pillar funds. Voluntary pension funds are established and managed by licensed pension fund managers. Compared to 2nd pillar funds, 3rd pillar pension funds managers have a greater flexibility to decide on fees and portfolio allocations. Participants decide on the amount of money, frequency of contributions, as well as how and when to receive payments (contributions can be suspended, money can be taken out, as a whole or in part, before reaching the retirement age). Contributions can be transferred by participants themselves or by their employers (usually as a motivational package offered to the employees), also by other third parties. Participants become entitled to a pension benefit once they are five years within the established age for old-age pension. |
| LU | The national market has some fiscal product called 111bis which is Pillar III. |
| LV | Personal pension products are established by licensed pension funds. This is an opportunity for people to make individual contributions, which they will be able to withdraw when they reach the age of 55. Accumulated capital can also be inherited. |

| | |
|------------------|--|
| <p>MT</p> | <p>The Retirement Pensions Act, 2011, defines a Personal Retirement Scheme as a Retirement Scheme which is not an Occupational Scheme and to which contributions are made for the benefit of an individual. The MFSA is also currently working on a proposal which will regulate local Maltese insurance undertakings which are distributing insurance products which have a pension element.</p> <p>Some of these insurance products are structured similar to insurance based investment products, however they do not fall under the definition of IDD since they are approved by the Commissioner of Inland Revenue as pension products, under Maltese national law and have some specific features such as annual withdrawals which render them pension products.</p> <p>The aim of this new regime is to clarify the prudential requirements, and most importantly the conduct of business requirements which such undertakings are required to comply with.</p> |
| <p>NL</p> | <p>Individual retirement savings that are tax deductible. Predominantly bank and insurance products (savings and investment products). The best estimate of the size of the market is around 10% of pension savings in total.</p> |
| <p>NO</p> | <p>N.A.</p> |
| <p>PL</p> | <p>IKZE (Individual retirement savings account) and IKE (Individual retirement account) are personal saving accounts that facilitate saving for the future retirement need.</p> |
| <p>PT</p> | <p>Pillar III products include individual membership of open pension funds and retirement saving schemes (Plano Poupança Reforma – “PPR”), the latter which can be financed by life insurance contracts, pension funds or investment funds. The reimbursement of the accumulated amount from PPR is possible at any time, but a tax penalty applies. Withdrawals from PPRs are not subject to penalties in the following cases: (i) at retirement age, (ii) permanent disability of the participant or any member of his household, (iii) at the age of 60, (iv) severe illness of the participant or any member of his household, (v) from payment of installments of credit guaranteed by mortgage on the participant’s own residence, and (vi) long-term unemployment of the participant or any member of his household.</p> |
| <p>RO</p> | <p>Pillar 3 consists of 10 voluntary pension funds, managed by 8 PMCs. All Pillar 3 pension funds are DC, but some of them are DC with guarantees. These pension funds do not offer investment options to their members, but some PMCs offer a choice between their medium or high risk pension funds.</p> <p>Contributions can be made both by the employer and the member. Pillar 3 is regulated through a separate, national law. Retirement conditions are set out in this law and do not vary among pension funds.</p> |

| SE | N.A. |
| SI | <p>PPPs are life cycle products based on the rules set for occupational pensions. In such products the investment strategy of the product is more aggressive at inception to be then shifted to more moderate investment strategy (middle age group) and finally for older contributors it is moved to an investment return guarantee strategy.</p> |
| SK | <p>Definition of the Slovak IORP institutions is broader than IORP definition (see below). It could be described as occupational pension schemes as well as personal pension products (voluntary participation, voluntary employer’s contributions).</p> <p>The supplementary pension scheme (third pillar) is governed by the Act No. 650/2004 Coll. of 26 October 2004 on the supplementary pension scheme (hereinafter “Act No. 650/2004 Coll.”) in Slovakia. The Directive (EU) 2016/2341 of the European Parliament and of the Council of 14 December 2016 on the activities and supervision of institutions for occupational retirement provision (Directive IORP II) has been fully transposed into the Act No. 650/2004 Coll.</p> <p>In according to the Act No. 650/2004 Coll. the supplementary pension management companies are joint stock companies incorporated in the Slovak Republic whose scope of business is the establishment and management of supplementary pension funds as part of the supplementary pension scheme, and on the basis of an authorization issued by National Bank of Slovakia (hereinafter “NBS”). The supplementary pension management companies are entities with legal personality (nature), and the supplementary pension fund have no legal personality (nature). The supplementary pension management companies shall establish and manage at least one contributory supplementary pension fund and one distribution supplementary pension fund.</p> <p>The supplementary pension scheme is in Slovakia a voluntary scheme (enrolment is compulsory only for people working in certain risky occupations), defined contribution scheme based on the collection of contributions from participants and employers and funded scheme whose purpose is to earn returns on the contributions paid into the scheme and then pay participants supplementary pension benefits in old age. A participant under the third pillar is an employee or other natural person who is at least 18 years of age and has concluded a supplementary pension scheme agreement (hereinafter "participant agreement") with a supplementary pension management company. The participants can decide in which supplementary pension management company and which supplementary pension fund or funds will be participate with specific investment strategy appropriate to their risk appetite and their expected potential return.</p> <p>The employer can conclude (it is compulsory only for employer in certain risky works) with a supplementary pension company an employer agreement in which the employer shall undertake to pay and transfer contributions under the conditions, in the amount, by the due date, and in the manner stipulated in the agreement for those of its employees who are participants and to fulfil its other obligations arising from the employer agreement, and the supplementary pension</p> |

ANNEX X — METHODOLOGY

The Consumer Trends Report methodology was adopted in 2012 and revised in 2013 and 2020 to produce more robust Consumer Trends Reports and adapt to the availability of new data to improve the robustness of the report. In terms of data source:

- ▶ As far as the **quantitative information** is concerned, the main database that are leveraged are the Solvency II database and, starting from 2020 the IORPs database.

The Solvency II reporting framework represents the most comprehensive database on the European insurance sector to date. Among other features, it collects premiums, claims and costs data from insurance undertakings on a line of business basis, which has been used in the present report. However, given its prudential nature, Solvency II's lines of business are risk categories and not product categories, meaning that, for example, part of the premiums collected through motor insurance policies can be distributed through different lines of business. It also captures data without distinction between premiums gathered from individual retail consumers and from corporate. Although data quality checks are regularly performed by NCAs and EIOPA, the quality of the data as well as the value that can be extracted from it (e.g. trends in the indicators over time) is improving over the years. Still, in particular when product-by-product information is used, the conclusions should be interpreted cautiously. The analysis of the Solvency II data is mainly performed using a list of Retail Risk Indicators (RRI)³².

The quantitative data for the pension section have been sourced from the IORPs database; a detailed description of the pension data and sources is reported in Annex II.

- ▶ The **qualitative data** are mainly sourced from the Members' Survey, the stakeholders' survey, an EU-wide Eurobarometer survey, and a new addition this year: a digital market monitoring survey.

NCAs were requested to fill in three survey for insurance (1) the top three consumer issues, positive development and supervisory activities, (2) focus topics, (3) information on complaints; and four for pension: (1) the top three consumer issues, positive development and supervisory activities, (2) focus topics, (3) information on complaints and (4) market overview and size.

In addition to the Members' contribution, EIOPA gathered inputs from other stakeholders (Insurance Europe, Pensions Europe, the European Federation of Insurance Intermediaries —

³² The Retail Risk Indicators methodology has been revised in November 2021: [Retail risk indicators: methodology update | Eioipa \(europa.eu\)](https://eioipa.europa.eu)

BIPAR, and the Nordic Financial Union), which answered directly through a questionnaire. Additionally, EIOPA received input from its two stakeholder groups, the IRSG and the OPSG. EIOPA also regularly meets stakeholders to discuss concrete insurance and pensions issues. Their feedback is particularly relevant to refine some of the conclusions of the report, in particular with regard to those aspects for which a straightforward interpretation of the data is not possible.

In 2023 EIOPA contracted Ipsos European Public Affairs to carry out an EU-wide Eurobarometer survey covering:

- ▶ **EU citizens, aged 18 and over:** a representative sample of EU citizens, aged 18 and over, in each of the 27 Member States of the EU was interviewed. Between 19 July and 27 July 2023, 26 168 interviews were conducted via computer-assisted web interviewing (CAWI), using Ipsos online panels and their partner network.

The survey aimed at gathering consumers experience with insurance and pension related services.
