

ANNEX II

INSTRUCTIONS REGARDING REPORTING TEMPLATES FOR INDIVIDUAL UNDERTAKINGS

This Annex contains additional instructions in relation to the templates included in Annex I of this Regulation. The first column of the tables identifies the items to be reported by identifying the columns and rows as showed in the template in Annex I.

Templates which shall be filled in in accordance with the instructions of the different sections of this Annex are referred to as ‘this template’ throughout the text of the Annex.

S.01.01 — Content of the submission

General comments:

This section relates to ~~opening~~, quarterly and annual submission of information for individual entities, ring-fenced funds, matching portfolios and remaining part.

When a special justification is needed, the explanation is not to be submitted within the reporting template but shall be part of the dialogue between undertakings and national competent authorities.

When a template is submitted only with zeros or without figures, then S.01.01 should indicate one of the “non reported” options.

S.01.03 — Basic Information — RFF and matching adjustment portfolios

General comments:

This section relates to ~~opening and~~ annual submission of information for individual entities.

All ring-fenced funds and matching portfolios should be identified regardless if they are material for the purposes of submission of information.

In the first table all ring-fenced funds and matching adjustments portfolios shall be reported. In case a ring-fenced fund has a matching portfolio not covering the full RFF three funds have to be identified, one for the RFF, other for the MAP inside the RFF and other for the remaining part of the fund (vice-versa for the situations where a MAP has an RFF).

In the second table the relations between the funds as explained in previous paragraph are explained. Only the funds with such relations shall be reported in the second table.

General comments:

This section relates to ~~opening~~ quarterly and annual submission of information for individual entities, ring-fenced funds and remaining part.

The ‘Solvency II value’ column (C0010) shall be completed using the valuation principles set out in the Directive 2009/138/EC, Delegated Regulation (EU) 2015/35, ~~Solvency 2~~ Technical Standards issued under the Directive 2009/138/EC and EIOPA Guidelines.

With regards to the ‘Statutory accounts value’ column (C0020), recognition and valuation methods are the ones used by undertakings in their statutory accounts in accordance with the local GAAP or IFRS if accepted as local GAAP. In template SR.02.01 this column is only applicable if the development of financial statements by RFF is required by national law.

The default instruction is that each item shall be reported in the ‘Statutory accounts value’ column, separately. However, in the ‘Statutory accounts value’ column the dotted rows were introduced in order to enable the reporting of aggregated figures if the split figures are not available.

S.02.02 — Assets and liabilities by currency

General comment:

This section relates to annual submission of information for individual entities.

This template is to be filled in accordance ~~to~~ with the Balance sheet (S.02.01). Valuation principles are laid down in Directive 2009/138/EC, Delegated Regulation (EU) 2015/35, Solvency II Technical Standards and Guidelines.

This template is not required to be submitted if one single currency represents more than 890 % of ~~assets and also of~~ liabilities. In case the value of technical provisions, as reported in any of the rows of the Solvency balance sheet R0510 to R0710 in R0030 and R0120 in S.12.01 and R0060 and R0160 in S.17.01, is negative, for the purposes of the calculation of the when a specific coverage is requested threshold above the this should be considering the absolute value of those notional amounts should be considered without and no netting of technical provisions between different LoBs.

If submitted, information on the reporting currency shall always be reported regardless of the amount of ~~assets and~~ liabilities. Information reported by currency shall at least represent 890 % of the ~~total assets and of the~~ total liabilities. The remaining ~~10-20~~ % ~~shall~~ may be aggregated. If a specific currency has to be reported ~~for either assets or liabilities~~ to comply with the 890 % ~~threshold rule~~ then that currency shall be reported for all ~~both assets and~~ liabilities.

Captives are exempted from reporting this template.

S.03.01 — Off-balance sheet items — General

General comments:

This section relates to annual submission of information for individual entities.

This section includes the information referring to off-balance sheet items and the maximum and solvency II value of contingent liabilities in Solvency II balance sheet.

A pool of assets that secure thean investment (e.g. the pool of assets that are a collateral for covered bonds) should not be reported in this template.

As regards the Solvency II value, the instructions define the items from a recognition perspective. Valuation principles are laid down in Directive 2009/138/EC, Delegated Regulation (EU) 2015/35, Solvency II Technical Standards and Guidelines.

Guarantees require the issuer to make specified payments to reimburse the holder for a loss it incurs if a specified debtor fails to make payment when due under the original or modified terms of a debt instrument. These guarantees can have various legal forms, such as financial guarantees, letters of credit, credit default contracts. These items shall not include guarantees stemming from insurance contracts, which are recognised in technical provisions.

A contingent liability is defined as:

- a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
- b) a present obligation that arises from past events even if:
 - i. it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
 - ii. the amount of the obligation cannot be measured with sufficient reliability.

Collateral is an asset with a monetary value or a commitment that secure the lender against the defaults of the borrower. The value of the collateral should be reported as the economic value of the collateral at per reference date (Solvency II value of the assets), not as the risk-adjusted value of a collateral according to article 197 of the Delegated Regulation.

~~The guarantees listed in this template are not reported in S.03.02 and S.03.03. This means that o~~Only limited guarantees are to be reported in this template excluding information about any provided or received unlimited guarantee.

This template is required to be submitted when any of the following conditions apply:

a) the amount of any of the following sums is higher than 2% of Total Assets:

- i. (C0020/R0010) Value of guarantee/collateral/contingent liabilities — Guarantees provided by the undertaking, including letters of credit + (C0020/R0300) Value of guarantee/collateral/contingent liabilities — Total collateral pledged + (C0010/R0400) Maximum value — Total Contingent liabilities;
- ii. (C0020/R0030) Value of guarantee/collateral/contingent liabilities — Guarantees received by the undertaking, including letters of credit + (C0020/R0200) Value of guarantee/collateral/contingent liabilities — Total collateral held; or

b) the undertaking has provided or received unlimited guarantee.

S.04.03 — Basic Information – List of underwriting entities

General comments

This section relates to annual submission of information for individual insurance and reinsurance undertakings only.

The reporting instructions for template S.04.03 should be read in conjunction with the reporting instructions for S.04.04 and S.04.05. –Across these three templates, entities shall report all business from two distinct perspectives: location of underwriting and location of risk.

The information in these templates shall include:

- All insurance business regardless of the possible different classification between investment contracts and insurance contracts applicable in the financial statements; and
- Direct business and accepted reinsurance business.

This template is to be reported from an accounting perspective (i.e. Local GAAP, or IFRS if accepted as local GAAP); however, it shall ~~however~~ be fulfilled using the lines of business as defined in Annex I to Delegated Regulation (EU) 2015/35. Undertakings shall use the recognition and valuation basis as for the published financial statements (i.e. no new recognition or re-valuation is required) except for the classification between investment contracts and insurance contracts when this is applicable in the financial statements.

The information in these templates shall be presented gross, without deduction of reinsurance ceded.

For the purposes of this template ‘country of establishment’ means:

- a) The country where the insurance undertaking is authorised (home country) when the contract was not sold through a branch; and
- b) The country where the branch is located (host country) when the contract was sold through a branch.

For the purposes of this template, an intermediary is not considered to be a separate underwriting entity. –If an intermediary is used, or in any other situation, the country of establishment is either a) or b) depending on who sold the contract.

S.04.04 — Activity by country – location of underwriting

General comments

This section relates to annual submission of information for individual insurance and reinsurance undertakings only.

The reporting instructions for template S.04.04 should be read in conjunction with the reporting instructions for S.04.03 and S.04.05. –Across these three templates, entities shall report all business from two distinct perspectives: location of underwriting and location of risk. -Template S.04.04 focuses on the location of underwriting.

The information shall be reported distinguishing between the business underwritten in the country in which each of the underwriting entities (as listed in template S.04.03) are established and business underwritten in each of the other countries belonging to the EEA under freedom to provide services (FPS) by each of the underwriting entities.

Any business underwritten by an underwriting entity which is not underwritten under freedom to provide services shall be classified as business underwritten in the country in which the underwriting entity is established.

The summation of any row in C0030 across all considered countries shall total to the value provided in C0020 for that same row.

S.04.05 — Activity by country – location of risk

General comments

This section relates to annual submission of information for individual insurance and reinsurance undertakings only.

The reporting instructions for template S.04.05 should be read in conjunction with the reporting instructions for S.04.03 and S.04.04. –Across these three templates, entities shall report all business from two distinct perspectives: location of underwriting and location of risk. –Template S.04.05 focuses on the location of risk.

For the purposes of this template and in the case of direct insurance, the ‘country in which the risk is situated’ means:

- a) the country in which the property is situated, where the insurance relates either to buildings or to buildings and their contents, in so far as the contents are covered by the same insurance policy;
- b) the country of registration, where the insurance relates to vehicles of any type;
- c) the country where the policy holder took out the policy in the case of policies of a duration of four months or less covering travel or holiday risks, whatever the class concerned;
- d) the country in which the credit/receivable is situated, where the insurance relates to credit/receivables;
- e) in all cases not explicitly covered by points (a), (b), (c) or (d), the country in which either of the following is situated:
 - i. the habitual residence of the policy holder; or
 - ii. if the policy holder is a legal person, that policy holder’s establishment to which the contract relates.

For the purposes of this template and in the case of proportional or non-proportional reinsurance, the ‘country in which the risk is situated’ means the country of localisation of the ceding undertaking.

~~S.05.02—Premiums, claims and expenses by country~~

~~General comments:~~

~~This section relates to annual submission of information for individual entities. The template is not due when the thresholds for reporting by country described below are not applicable, i.e. the home country represents 90 % or more of the total gross written premiums.~~

~~This template shall be reported from an accounting perspective, i.e.: Local GAAP or IFRS if accepted as local GAAP. The template is based on a year to date basis. Undertakings shall use the recognition and valuation basis as for the published financial statements, no new recognition or re-valuation is required, except for the classification between investment contracts and insurance contracts when this is applicable in the financial statements. This template shall include all insurance business regardless of the possible different classification between investment contracts and insurance contracts applicable in the financial statements.~~

~~The following criteria for the classification by country shall be used:~~

- ~~—— The information, provided by country, shall be completed for the five countries with the biggest amount of gross written premiums in addition to the home country or until reaching 90 % of the total gross written premiums;~~
- ~~—— For the direct insurance business for the lines of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, ‘Medical expense’, ‘Income protection’, ‘Workers’ compensation’, ‘Fire and other damage to property’ and ‘Credit and suretyship’ information shall be reported by country where the risk is situated as defined in Article 13 (13) of Directive 2009/138/EC;~~

~~For direct insurance business for all other line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35, information shall be reported by country where the contract was entered into;~~

~~For proportional and non-proportional reinsurance information shall be reported by country of localisation of the ceding undertaking.~~

For the purposes of this template ‘country where the contract was entered into’ means:

~~a) The country where the insurance undertaking is established (home country) when the contract was not sold through a branch or freedom to provide services;~~

~~b) The country where the branch is located (host country) when the contract was sold through a branch;~~

~~c) The country where the freedom to provide services was notified (host country) when the contract was sold through freedom to provide services.~~

~~d) If an intermediary is used or in any other situation, it is a), b) or c) depending on who sold the contract.~~

S.06.02 — List of assets

General comments:

This section relates to quarterly and annual submission of information for individual entities.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to Complementary Identification Code (‘CIC’) refer to Annex VI — CIC table of this Regulation.

This template shall reflect the list of all assets included in the Balance-sheet classifiable as asset categories 0 to 9 of Annex IV — Assets Categories of this Regulation. In particular in case of securities lending and repurchase agreements the underlying securities that are kept in the Balance-sheet shall be reported in this template.

This template contains an item-by-item list of assets held directly by the undertaking (i.e. not on a look-through basis), classifiable as asset categories 0 to 9 (in case of unit-linked and index-linked products managed by the (re)insurance undertaking, the assets to be reported are also only the ones covered by asset categories 0 to 9, e.g. recoverables and liabilities related to ~~this-these~~ products shall not be reported), with the following exceptions:

- Cash shall be reported in one row per currency, for each combination of items C0060, C0070, C0080 and C0090;
- Transferable deposits (cash equivalents) and other deposits with maturity of less than one year shall be reported in one row per pair of bank and currency, for each combination of items C0060, C0070, C0080, C0090 and C0290;
- Mortgages and loans to individuals, including loans on policies, shall be reported in two rows, one row regarding loans to administrative, management and

supervisory body, for each combination of items C0060, C0070, C0080, C0090 and C0290 and another regarding loans to other natural persons, for each combination of items C0060, C0070, C0080, C0090 and C0290;

d) Deposits to cedants shall be reported in one single line, for each combination of items C0060, C0070, C0080 and C0090;

e) ~~Plant and equipment for the own use of the undertaking shall be reported in one single line, for each combination of items C0060, C0070, C0080 and C0090;~~

All reporting items shall be reported, except when otherwise stated in these instructions.

Items C0110, C0120, C0121, C0122, C0130, C0140, C0141, C0160, C0200, C0230, C0270, C0280, C0310, C0370, and C0380 are not applicable to CIC 09 - Other investments.

This template comprises two tables: Information on positions held and Information on assets.

On the table Information on positions held, each asset shall be reported separately in as many lines as needed in order to properly fill in all non-monetary variables with the exception of item 'Quantity', requested in that table. If for the same asset two values can be attributed to one variable, then this asset needs to be reported in more than one line.

On the table Information on assets, each asset shall be reported separately, with one row for each asset, filling in all applicable variables requested in that table.

The information regarding the external rating (C0320) and nominated External Credit Assessment Institutions ('ECAI') (C0330) may be limited (not reported) in the following circumstances:

- a) through a decision of the national supervisory authority ('NSA') under Article 35 (6) and (7) of the Directive 2009/138/EC; or
- b) through a decision of the national supervisory authority in the cases where the insurance and reinsurance undertakings have in place outsourcing arrangements in the area of investments that lead to this specific information not being available directly to the undertaking;

S.06.03 — Collective investment undertakings — look-through approach

General comments:

This section relates to quarterly and annual submission of information for individual entities.

This template contains information on the look through of collective investment undertakings or investments packaged as funds, including when they are participations, by underlying asset category, country of issue and currency. Considering proportionality and specific instructions of the template, the look through shall be performed until the asset categories, countries and currencies are identified. In case of funds of funds the look-through shall follow the same approach.

The template shall include information corresponding to 100 % of the value invested in collective investment undertakings. However, for the identification of countries the look-through shall be implemented in order to identify the exposures of 90 % of the total value of the funds minus the amounts relating to CIC 8 and 9, and for the identification of currencies the look-through shall be implemented in order to identify the exposures of 90 % of the total value of the funds. Undertakings shall ensure that the 10 % not identified by country is diversified across geographical areas, for example that not more than 5 % is in one single country. The look-through shall be applied by undertakings starting from the major, considering the amount invested, to the lowest single fund and the approach shall be kept consistent over time.

Quarterly information shall only be reported when the ratio of collective investments undertakings held by the undertaking to total investments, measured as the ratio between item C0010/R0180 of template S.02.01 plus collective investments undertakings included in item C0010/R0220 of template S.02.01 plus collective investments undertakings included in item C0010/R0090 and the sum of item C0010/R0070 and C0010/RC0220 of template S.02.01, is higher than 30 %.

Items shall be reported with positive values unless otherwise stated in the respective instructions.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation.

S.06.04 - Sustainable investments and climate change-related risks to investments

General comments:

This section relates to annual submission of information for individual entities.

This template contains information on the share of sustainable investments, as defined by the applicable Commission Delegated Regulation (see below) and the share of investments exposed to climate change-related transition and physical risk. As an input to computing the share of investments exposed to transition risk, undertakings are required to report four-digit level NACE codes for NACE sections A to N in the List of assets S.06.02. For physical risk, undertakings are required to report in a standardised manner on the location of properties.

S.07.01 — Structured products

General comments:

This section relates to annual submission of information for individual entities.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation.

This template contains an item-by-item list of structured products held directly by the undertaking in its portfolio (i.e. not on a look-through basis). Structured products are defined as assets falling into the asset categories 5 (Structured notes) and 6 (Collateralised securities).

This template shall only be reported when the amount of structured products, measured as the ratio between assets classified as asset categories 5 (Structured notes) and 6 (Collateralised securities) as defined in Annex IV — Asset Categories of this Regulation and the sum of item C0010/R0070 and C0010/R0220 of template S.02.01, is higher than 5 %.

In some cases the types of structured products (C0070) identify the derivative embedded in the structured product. In this case this classification shall be used when the structured product has the referred derivative embedded.

	ITEM	INSTRUCTIONS
C0040	Asset ID Code	<p>The Identification code of the structured product, as reported in S.06.02. using the following priority:</p> <ul style="list-style-type: none"> – ISO 6166 ISIN when available – Other recognised codes (e.g.: CUSIP, Bloomberg Ticker, Reuters RIC) – Code attributed by the undertaking, when the options above are not available. The code used shall be kept consistent over time and shall not be reused for other product. <p>When the same Asset ID Code needs to be reported for one asset that is issued in 2 or more different currencies, it is necessary to specify the Asset ID code and the ISO 4217 alphabetic code of the currency, as in the following example: ‘code+EUR’</p>
C0050	Asset ID Code type	<p>Type of ID Code used for the ‘Asset ID Code’ item. One of the options in the following closed list shall be used:</p> <p>1 — ISO/6166 for ISIN</p> <p>2 — CUSIP (The Committee on Uniform Securities Identification Procedures number assigned by the CUSIP Service Bureau for U.S. and Canadian companies)</p>

This item is not applicable for non-credit structured product.

S.08.01 — Open derivatives

General comments:

This section relates to quarterly and annual submission of information for individual entities.

The derivatives categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation. This template contains an item-by-item list of derivatives held directly by the undertaking (i.e. not on a look-through basis), classifiable as asset categories A to F.

Derivatives are considered assets if their Solvency II value is positive or zero. They are considered liabilities if their Solvency II value is negative. Both derivatives considered as assets or considered as liabilities shall be included.

Information shall include all derivatives contracts that existed during the reporting period and were not closed prior to the reporting reference date.

If there are frequent trades on the same derivative, resulting in multiple open positions, the derivative can be reported on an aggregated or net basis, as long as all the relevant characteristics are common and following the specific instruction for each relevant item.

Items shall be reported with positive values unless otherwise stated in the respective instructions.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- a) Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the ‘underlying’).
- b) It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- c) It is settled at a future date.

This template comprises two tables: Information on positions held and Information on derivatives.

On the table Information on positions held, each derivative shall be reported separately in as many rows as needed in order to properly fill in all non-monetary variables, requested in that table. If for the same derivative two values can be attributed to one variable, then this derivative needs to be reported in more than one line.

In particular, for derivatives that have more than a pair of currencies, it shall be split into the pair components and reported in different rows.

On the table Information on derivative, each derivative shall be reported separately, with one row for each derivative, filling in all variables requested in that table.

The information regarding the External rating (C0290) and Nominated ECAI (C0300) may be limited (not reported) in the following circumstances:

- ae) through a decision of the national supervisory authority under Article 35 (6) and (7) of the Directive 2009/138/EC; or
- bd) through a decision of the national supervisory authority in the cases where the insurance and reinsurance undertakings have in place outsourcing arrangements in the area of investments that lead to this specific information not being available directly to the undertaking.

		<p>by exchanging a (lower) cash-flow pattern by another with a higher value, using a derivative or set of derivatives, without changing the asset' portfolio composition, having a lower investment amount and less transaction costs.</p> <p>One of the options in the following closed list shall be used:</p> <p>1 — Micro hedge</p> <p>2 — Macro hedge</p> <p>3 — Matching assets and liabilities cash-flows used in the context of matching adjustment portfolios</p> <p>4 — Efficient portfolio management, other than 'Matching assets and liabilities cash-flows used in the context of matching adjustment portfolios'</p>
C0120	Delta	<p>Only applicable to CIC categories B and C (Call and put options), with reference to the reporting date.</p> <p>Measures the rate of change of option value with respect to changes in the underlying asset's price.</p> <p>This shall be reported as a decimal.</p>
C0130	Notional amount of the derivative	<p>The amount covered or exposed to the derivative, <u>reported in the original currency</u>.</p> <p>For futures and options corresponds to contract size multiplied by the trigger value and by the number of contracts reported in that line. For swaps and forwards it corresponds to the contract amount of the contracts reported in that line. When the trigger value corresponds to a range, the average value of the range shall be used.</p> <p>The notional amount refers to the amount that is being hedged/invested (when not covering risks). If several trades occur, it shall be the net amount at the reporting date.</p>
C0140	Buyer/Seller	<p>Only for futures and options, swaps and credit derivatives contracts.</p> <p>Identify whether the derivative contract was bought or sold.</p> <p>The buyer and seller position for swaps is defined relatively to the security or notional amount and the swap flows.</p> <p>A seller of a swap owns the security or notional amount at the contract inception and agrees to deliver during the contract term that security or notional amount, including</p>

		<p>any other outflows related to the contract, when applicable.</p> <p>A buyer of a swap will own the security or the notional amount at the end of the derivatives contract and will receive during the contract term that security or notional amount, including any other inflows related to the contract, when applicable.</p> <p>One of the options in the following closed list shall be used, with the exception of Interest Rate Swaps:</p> <p>1 — Buyer</p> <p>2 — Seller</p> <p>For interest rate swaps one of the options in the following closed list shall be use:</p> <p>3 — FX–FL: Deliver fixed–for–floating</p> <p>4 — FX–FX: Deliver fixed–for–fixed</p> <p>5 — FL–FX: Deliver floating–for–fixed</p> <p>6 — FL–FL: Deliver floating–for–floating</p>
C0150	Premium paid to date	The payment made (if bought), for options and also up–front and periodical premium amounts paid for swaps, since the moment the undertaking entered into the derivative contract.
C0160	Premium received to date	The payment received (if sold), for options and also up–front and periodical premium amounts received for swaps, since the moment the undertaking entered into the derivative contract.
C0170	Number of contracts	<p>Number of similar derivative contracts reported in the line. It shall be the number of contracts entered into. For Over–The–Counter derivatives, e.g., one swap contract, ‘1’ shall be reported, if ten swaps with the same characteristics, ‘10’ shall be reported.</p> <p><u>The number of contracts can be non-integer, when there’s a need to split contracts.</u></p> <p>The number of contracts shall be the ones outstanding at the reporting date.</p>
C0180	Contract size	<p>Number of underlying assets in the contract (e.g. for equity futures it is the number of equities to be delivered per derivative contract at maturity, for bond futures it is the reference amount underlying each contract).</p> <p>The way the contract size is defined varies according with the type of instrument. For futures on equities it is common to find the contract size defined as a function of the number of shares underlying the contract.</p>

		<p>For futures on bonds, it is the bond nominal amount underlying the contract.</p> <p>Only applicable for futures and options.</p>
C0190	Maximum loss under unwinding event	<p>Maximum amount of loss if an unwinding event occurs. Applicable to CIC category F.</p> <p>Where a credit derivative is 100 % collateralised, the maximum loss under an unwinding event is zero.</p>
C0200	Swap outflow amount	<p>Amount delivered under the swap contract (other than premiums), during the reporting period. Corresponds to interest paid for IRS and amounts delivered for currency swaps, credit swaps, total return swaps and other swaps.</p> <p>In the cases where the settlement is made on a net basis then only one of the items C0200 and C0210 shall be reported.</p>
C0210	Swap inflow amount	<p>Amount received under the swap contract (other than premiums), during the reporting period. Corresponds to interest received for IRS and amounts received for currency swaps, credit swaps, total return swaps and other swaps.</p> <p>In the cases where the settlement is made on a net basis then only one of the items C0200 and C0210 shall be reported.</p>
C0220	Initial date	<p>Identify the ISO 8601 (yyyy-mm-dd) code of the date when obligations under the contract come into effect.</p> <p>When various dates occur for the same derivative, report only the one regarding the first trade date of the derivative and only one row for each derivative (no different rows for each trade) reflecting the total amount invested in that derivative considering the different dates of trade.</p> <p>In case of novation, the novation date becomes the trade date for that derivative.</p>
C0230	Duration	<p>Derivative duration, defined as the residual modified duration, for derivatives for which a duration measure is applicable.</p> <p>Calculated as the net duration between in and out flows from the derivative, when applicable.</p>
C0240	Solvency II value	<p>Value of the derivative as of the reporting date calculated as defined by Article 75 of the Directive 2009/138/EC. It can be positive, negative or zero.</p>

C0250	Valuation method	<p>Identify the valuation method used when valuing derivatives. One of the options in the following closed list shall be used:</p> <p>1 — quoted market price in active markets for the same assets or liabilities</p> <p>2 — quoted market price in active markets for similar assets or liabilities</p> <p>3 — alternative valuation methods</p> <p>6 — Market valuation according to Article 9(4) of Delegated Regulation (EU) 2015/35</p>

C0360	Contract name	Name of the derivative contract.

C0370	Currency	Identify the ISO 4217 alphabetic code of the currency of the derivative, i.e., currency of the notional amount of the derivative (e.g.: option having as underlying an amount in USD, currency for which the notional amount is expressed contractually for FX swap, etc.).
<u>C0371</u>	<u>Currency of price</u>	<u>Identify the ISO 4217 alphabetic code of the currency of the price of the derivative, i.e., currency of the amount exchanged against the notional amount of the derivative.</u>
C0380	CIC	Complementary Identification Code used to classify assets, as set out in Annex — VI CIC Table of this Regulation. When classifying derivatives using the CIC table, undertakings shall take into consideration the most representative risk to which the derivative is exposed to.
C0390	Trigger value	<p>Reference price for futures, strike price for options (for bonds, price shall be a percentage of the par amount), currency exchange rate or interest rate for forwards, etc.</p> <p>Not applicable to CIC D3 — Interest rate and currency swaps. For CIC F1 — Credit default swaps it shall not be completed if not possible.</p> <p>In the case of more than one trigger over time, report the next trigger occurring.</p> <p>When the derivative has a range of trigger values, report the set separated by comma ‘,’ if the range is not continuous and report the range separated by ‘–’ if it is continuous.</p>
C0400	Unwind trigger of contract	<p>Identify the event that causes the unwinding of the contract, out of the regular expiration or term conditions. One of the options in the following closed list shall be used:</p> <p>1 — Bankruptcy of the underlying or reference entity</p> <p>2 — Adverse fall in value of the underlying reference asset</p> <p>3 — Adverse change in credit rating of the underlying assets or entity</p> <p>4 — Novation, i.e. the act of replacing an obligation under the derivative with a new obligation, or replacing a party of the derivative with a new party</p> <p>5 — Multiple events or a combination of events</p> <p>6 — Other events not covered by the previous options</p> <p>9 — No unwind trigger</p>
C0410	Swap delivered currency	Identify the ISO 4217 alphabetic code of the currency of the swap price (only for currency swaps and currency and interest rate swaps).

C0420	Swap received currency	Identify the ISO 4217 alphabetic code of the currency of the swap notional amount (only for currency swaps and currency and interest rate swaps).
C0430	Maturity date	Identify the contractually defined ISO 8601 (yyyy-mm-dd) code of the date of close of the derivative contract, whether at maturity date, expiring date for options (European or American), etc.
<u>C0440</u>	<u>Swap delivered</u>	<u>Identify what the undertaking delivers under the swap contract (E.g.: Euribor+0.5%; 2.3%; EUR).</u>
<u>C0450</u>	<u>Swap received</u>	<u>Identify what the undertaking receives under the swap contract (E.g.: Euribor+0.5%; 2.3%; EUR).</u>

S.08.02 — Derivatives Transactions

General comments:

~~This section relates to quarterly and annual submission of information for individual entities.~~

~~The derivatives categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex V — CIC table of this Regulation.~~

~~This template contains an item by item list of closed derivatives held directly by the undertaking (i.e. not on a look-through basis), classifiable as asset categories A to F. When a contract is still open but has been reduced in size the closed portion shall be reported.~~

~~Derivatives are considered assets if their Solvency II value is positive or zero. They are considered liabilities if their Solvency II value is negative. Both derivatives considered as assets or considered as liabilities shall be included.~~

~~Closed derivatives are the ones that were open at some point of the reference period (i.e. last quarter if template is submitted quarterly or last year if template is only submitted annually) but were closed before the end of the reporting period.~~

~~If there are frequent trades on the same derivative, the derivative can be reported on an aggregated or net basis (indicating only the first and the last trade dates), as long as all the relevant characteristics are common and following the specific instruction for each relevant item.~~

~~Items shall be reported with positive values unless otherwise stated in the respective instructions.~~

~~A derivative is a financial instrument or other contract with all three of the following characteristics:~~

- ~~—— d) Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the ‘underlying’).~~

- ~~—— e) It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.~~
- ~~—— f) It is settled at a future date.~~

~~This template comprises two tables: Information on positions held and Information on derivatives.~~

~~On the table Information on positions held, each derivative shall be reported separately in as many rows as needed in order to properly fill in all non-monetary variables, requested in that table. If for the same derivative two values can be attributed to one variable, then this derivative needs to be reported in more than one line.~~

~~In particular, for derivatives that have more than a pair of currencies, it shall be split into the pair components and reported in different rows.~~

~~On the table Information on derivative, each derivative shall be reported separately, with one row for each derivative, filling in all variables requested in that table.~~

One of the options in the following closed list shall be used: 1—Life 2—Non-life: 3—Ring fenced funds 4—Other internal fund 5—Shareholders' funds 6—General The split is not mandatory, except for identifying ring fenced funds, but shall be reported if the undertaking uses it internally. When an undertaking does not apply a split 'general' shall be used.
C0070	Fund number	Applicable to derivatives held in ring fenced funds or other internal funds (defined according to national markets): Number which is attributed by the undertaking, corresponding to the unique number assigned to each fund. This number has to be consistent over time and shall be used to identify the funds in other templates. It shall not be re-used for a different fund.
C0080	Derivatives held in unit linked and index linked contracts	Identify the derivatives that are held by unit linked and index linked contracts. One of the options in the following closed list shall be used: 1—Unit linked or index linked 2—Neither unit linked nor index linked
C0090	Instrument underlying the derivative	ID Code of the instrument (asset or liability) underlying the derivative contract. This item is to be provided only for derivatives that have a single or multiple underlying instruments in the undertakings' portfolio. An index is considered a single instrument and shall be reported. Identification code of the instrument underlying the derivative using the following priority: ———ISO 6166 code of ISIN when available; ———Other recognised codes (e.g.: CUSIP, Bloomberg Ticker, Reuters RIC)

		<p>Code attributed by the undertaking for the underling instrument when the options above are not available and must be unique and consistent over time for that instrument;</p> <p>‘Multiple assets/liabilities’, if the underlying assets or liabilities are more than one.</p> <p>If the underlying instrument is an index then the code of the index shall be reported.</p>
C0100	Type of code of asset or liability underlying the derivative	<p>Type of ID Code used for the ‘Instrument underlying the derivative’ item. One of the options in the following closed list shall be used:</p> <p>1 ISO/6166 for ISIN</p> <p>2 CUSIP (The Committee on Uniform Securities Identification Procedures number assigned by the CUSIP Service Bureau for U.S. and Canadian companies)</p> <p>3 SEDOL (Stock Exchange Daily Official List for the London Stock Exchange)</p> <p>4 WKN (Wertpapier Kenn Nummer, the alphanumeric German identification number)</p> <p>5 Bloomberg Ticker (Bloomberg letters code that identify a company's securities)</p> <p>6 BBGID (The Bloomberg Global ID)</p> <p>7 Reuters RIC (Reuters instrument code)</p> <p>8 FIGI (Financial Instrument Global Identifier)</p> <p>9 Other code by members of the Association of National Numbering Agencies</p> <p>99 Code attributed by the undertaking in case that none of the above options are available. This option shall also be used for the cases of ‘Multiple assets/liabilities’ and indexes</p> <p>This item is not reported for derivatives which have as underlying more than one asset or liability.</p>
C0110	Use of derivative	<p>Describe the use of the derivative (micro/macro hedge, efficient portfolio management):</p> <p>Micro hedge refers to derivatives covering a single financial instrument (asset or liability), forecasted transaction or other liability.</p> <p>Macro hedge refers to derivatives covering a set of financial instruments (assets or liabilities), forecasted</p>

		<p>transactions or other liabilities.</p> <p>Efficient portfolio management refers usually to operations where the manager wishes to improve a portfolio' income by exchanging a (lower) cash flow pattern by another with a higher value, using a derivative or set of derivatives, without changing the asset' portfolio composition, having a lower investment amount and less transaction costs.</p> <p>One of the options in the following closed list shall be used:</p> <p>1—Micro hedge</p> <p>2—Macro hedge</p> <p>3—Matching assets and liabilities cash flows used in the context of matching adjustment portfolios</p> <p>4—Efficient portfolio management, other than 'Matching assets and liabilities cash flows used in the context of matching adjustment portfolios'</p>
€0120	Notional amount of the derivative	<p>The amount covered or exposed to the derivative.</p> <p>For futures and options corresponds to contract size multiplied by the trigger value and by the number of contracts reported in that line. For swaps and forwards it corresponds to the contract amount of the contracts reported in that line.</p> <p>The notional amount refers to the amount that is being hedged/invested (when not covering risks). If several trades occur, it shall be the net amount at the reporting date.</p>
€0130	Buyer/Seller	<p>Only for futures and options, swaps and credit derivatives contracts (currency, credit and securities swaps).</p> <p>Identify whether the derivative contract was bought or sold.</p> <p>The buyer and seller position for swaps is defined relatively to the security or notional amount and the swap flows.</p> <p>A seller of a swap owns the security or notional amount at the contract inception and agrees to deliver during the contract term that security or notional amount, including any other outflows related to the contract, when applicable.</p> <p>A buyer of a swap will own the security or the notional amount at the end of the derivatives contact and will receive during the contract term that security or notional amount, including any other inflows related to the contract, when applicable.</p> <p>One of the options in the following closed list shall be</p>

€0140	Premium paid to date	<p>The payment made (if bought), for options and also up-front and periodical premium amounts paid for swaps, since the moment the undertaking entered into the derivative contract.</p>
€0150	Premium received to date	<p>The payment received (if sold), for options and also up-front and periodical premium amounts received for swaps, since the moment the undertaking entered into the derivative contract.</p>
€0160	Profit and loss to date	<p>Amount of profit and loss arising from the derivative since the moment the undertaking entered into the derivative contract, realised at the closing/maturing date. Corresponds to the difference between the value (price) at sale date and the value (price) at acquisition date.</p> <p>This amount could be positive (profit) or negative (loss).</p>
€0170	Number of contracts	<p>Number of similar derivative contracts reported in the line. For Over The Counter derivatives, e.g., one swap contract, 1 shall be reported, if ten swaps with the same characteristics, 10 shall be reported.</p> <p>The number of contracts shall be the ones entered into and that were closed at the reporting date.</p>
€0180	Contract size	<p>Number of underlying assets in the contract (e.g. for equity futures it is the number of equities to be delivered per derivative contract at maturity, for bond futures it is the reference amount underlying each contract).</p> <p>The way the contract size is defined varies according with the type of instrument. For futures on equities it is common to find the contract size defined as a function of the number of shares underlying the contract.</p> <p>For futures on bonds, it is the bond nominal amount underlying the contract.</p> <p>Only applicable for futures and options.</p>

C0190	Maximum loss under unwinding event	Maximum amount of loss if an unwinding event occurs. Applicable to CIC category F.
C0200	Swap outflow amount	Amount delivered under the swap contract (other than premiums), during the reporting period. Corresponds to interest paid for IRS and amounts delivered for currency swaps, credit swaps, total return swaps and other swaps. In the cases where the settlement is made on a net basis then only one of the items C0200 and C0210 shall be reported.
C0210	Swap inflow amount	Amount received under the swap contract (other than premiums), during the reporting period. Corresponds to interest received for IRS and amounts received for currency swaps, credit swaps, total return swaps and other swaps. In the cases where the settlement is made on a net basis then only one of the items C0200 and C0210 shall be reported.
C0220	Initial date	Identify the ISO 8601 (yyyy-mm-dd) code of the date when obligations under the contract come into effect. When various trades occur for the same derivative, report only the one regarding the first trade date of the derivative and only one row for each derivative (no different rows for each trade) reflecting the total amount invested in that derivative considering the different dates of trade. In case of novation, the novation date becomes the trade date for that derivative.
C0230	Solvency II value	Value of the derivative calculated as defined by article 75 of the Directive 2009/138/EC at the trade (closing or sale) or maturity date. It can be positive, negative or zero.

S.10.01 — Securities lending and repos

General comments:

This section relates to annual submission of information for individual entities.

This template contains an item-by-item list of securities lending transactions and repurchase agreements (buyer and seller) contracts, held directly by the undertaking (i.e. not on a look-through basis), which also include ~~also~~ the liquidity swaps referred to in Article 309 (2)(f) of the Delegated Regulation (EU) 2015/35.

It shall be reported only when the value of the underlying securities on and ~~off-balance~~off-balance sheet involved in lending or repurchase agreements, with maturity date falling after the reporting reference date represent more than 5 % of the total investments as reported in C0010/R0070 and C0010/R0220 of template S.02.01.

All contracts that are on the balance sheet or ~~off-balance~~off-balance sheet shall be reported. The information shall include all contracts in the reporting period regardless of whether they

were open or closed at the reporting date. For contracts which are part of a roll-over strategy, where they substantially are the same transaction, only open positions shall be reported.

A repurchase agreement (repo) is defined as the sale of securities together with an agreement for the seller to buy back the securities at a later date. Securities lending is defined as the lending of securities by one party to another, which requires that the borrower provides the lender with collateral.

Items shall be reported with positive values unless otherwise stated in the respective instructions.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation.

Each repo and securities lending contract shall be reported in as many rows as needed to provide the information requested. If for one item one option fits one part of the instrument being reported and a different option fits the other part, then the contract needs to be unbundled unless is stated otherwise in the instructions.

S.11.01 — Assets held as collateral

General comments:

This section relates to annual submission of information for individual entities.

This template should be only reported annually when the ratio of the value of assets held as collateral to total balance sheet exceeds 10%.

The pool of assets that secure the investment (e.g. the pool of asset that are a collateral for covered bonds) should not be reported in this template. The collateral covering reinsurance receivables should be reported in S.11.01 template.

This template contains an item-by-item list of off-balance sheet assets held as collateral for covering balance sheet assets held directly by the undertaking (i.e. not on a look-through basis) at the the-end of the reporting period. Collaterals are considered ‘held’ when the undertaking has the ‘right of direct access to the collateral’, so the collateral has been committed to the entity and it is individually identifiable.

It consists of detailed information from the perspective of the assets held as collateral and not from the perspective of the collateral arrangement.

If there is a pool of collaterals or a collateral arrangement comprising multiple assets, as many rows as the assets in the pool or arrangement shall be reported.

This template comprises two tables: Information on positions held and Information on assets.

On the table Information on positions held, each asset held as collateral shall be reported separately in as many rows as needed in order to properly fill in all variables requested in that table. If for the same asset two values can be attributed to one variable, then this asset needs to be reported in more than one line. Real estate held as collateral of the mortgages related to individuals shall be reported in one single line.

On the table Information on assets, each asset held as collateral shall be reported separately, with one row for each asset, filling in all variables requested in that table.

All items except items ‘Type of asset for which the collateral is held’ (C0140), ‘Name of the counterparty pledging the collateral’ (C0060) and ‘Name of the group of the counterparty pledging the collateral’ (C0070) relate to information on the assets held as collateral. Item C0140 relates to the asset on the balance sheet for which the collateral is held while items C0060 and C0070 relate to the counterparty pledging the collateral.

The asset categories referred to in this template are the ones defined in Annex IV — Assets Categories of this Regulation and references to CIC codes refer to Annex VI — CIC table of this Regulation.

Template S.11.01 includes the off-balance sheet assets held as collateral for covering balance sheet assets held directly by the undertaking and thisthese amounts shall also be reported in S.03.01 in C0020/R0100 to R0130.

S.12.01 — Life and Health SLT Technical Provisions

General comments:

This section relates to quarterly and annual submission of information for individual entities, ring fenced–funds, matching adjustment portfolios and remaining part.

Undertakings may apply appropriate approximations in the calculation of the technical provisions as referred to in Article 21 of Delegated Regulation (EU) 2015/35. In addition, Article 59 of the Delegated Regulation (EU) 2015/35 may be applied to calculate the risk margin during the financial year.

Line of business for life obligations: The lines of business, referred to in Article 80 of the Directive 2009/138/EC, as defined in Annex I to Delegated Regulation (EU) 2015/35. The segmentation shall reflect the nature of the risks underlying the contract (substance), rather than the legal form of the contract (form). By default, where an insurance or reinsurance contract covers risks across the lines of business undertakings shall, where possible, unbundled the obligations into the appropriate lines of business (Article 55 of Delegated Regulation (EU) 2015/35).

Lines of business ‘Index–linked and unit–linked insurance’, ‘Other life insurance’ and ‘Health insurance’ are split between ‘Contracts without options and guarantees’ and ‘Contracts with options or guarantees’. For this split the following shall be considered:

- ‘Contracts without options and guarantees’ shall include the amounts related to contracts without any financial guarantees or contractual options, meaning that the technical provision calculation does not reflect the amount of any financial guarantees or contractual options. Contracts with non-material contractual options or financial guarantees that are not reflected in the technical provisions calculation shall also be reported in this column;
- ‘Contracts with options or guarantees’ shall include contracts that have either financial guarantees, contractual options, or both as far as the technical provision calculation reflect the existence of those financial guarantees or contractual options.

The information reported shall be gross of reinsurance as information on Recoverables from reinsurance/SPV and Finite reinsurance is requested in specific rows.

All references to surrender values should not be applicable to the reinsurance business.

The information to be reported between R0010 and R0100 shall be after the volatility adjustment, the matching adjustment and the transitional adjustment to the relevant risk-free interest rate term structure if applied but shall not include the transitional deduction to technical provisions. The amount of transitional deduction to technical provisions is requested separately between rows R0110 and R0130.

S.12.02 — Life and Health SLT Technical Provisions — by Country

General comments:

This section relates to annual submission of information for individual entities. The template is not due when the thresholds for reporting by country described below are not applicable, i.e. the home country represents 100 % of the sum of the technical provisions calculated as a whole and gross best estimate. When this amount is higher than 90 % but lower than 100 % ~~then~~ only R0010, R0020 and R0030 shall be reported.

This template shall be reported for the material life line of business, as defined in Annex II to Delegated Regulation (EU) 2015/35, representing a coverage of 90% of the life technical provisions. Line of business shall be reported in accordance with the amount of technical provisions, i.e. the line of business with the highest amount of technical provisions.

Undertakings shall take into account all the obligations in different currencies and convert them into the reporting currency.

The information by country shall be reported according to the following specifications:

- a) Information on the home country shall be always reported regardless of the amount of technical provisions calculated as a whole and gross best estimate;
- b) Information reported by country shall at least represent 90 % of the sum of the technical provisions calculated as a whole and gross best estimate of any line of business, as defined in Annex I to Delegated Regulation (EU) 2015/35;
- c) If a specific country has to be reported for a material particular line of business to comply with sub-paragraph b) then that country shall be reported for all material lines of business;
- d) The other countries shall be reported aggregated in 'other-EEA' or 'other-non-EEA'.
- e) For direct business information shall be reported by country where the contract was entered into;
- f) For proportional and non-proportional reinsurance information shall be reported by country of localisation of the ceding undertaking.

For the purposes of this template 'country where the contract was entered into' means:

- a) The country where the insurance undertaking is established (home country) when the contract was not sold through a branch or freedom to provide services;
- b) The country where the branch is located (host country) when the contract was sold through a branch;
- c) The country where the freedom to provide services was notified (host country) when the contract was sold through freedom to provide services.
- d) If an intermediary is used or in any other situation, it is a), b) or c) depending on who sold the contract.

The negative technical provisions at the level of the line of business or countries shall be considered with absolute value for the purpose of the calculation of the materiality of the above thresholds.

The information to be reported shall include the volatility adjustment, the matching adjustment, the transitional adjustment to the relevant risk-free interest rate term structure and the transitional deduction to technical provisions.

S.13.01 — Projection of future gross cash flows (Best Estimate –life)

General comments:

This part of Annex II relates to annual submission of information for individual entities.

This template shall include information only in relation to the best estimates. The cash flows to be reported are gross of reinsurance and undiscounted.

Cash-flow projections such as central scenarios can be used as no perfect reconciliation with Best Estimate calculation is required. It should be noted that the projection horizon of future cash-flows should be realistic and it is not limited by contract boundaries. E.g. a pure unit-linked product with immediate contract boundaries should not be assumed to immediately lapse. Instead, realistic projections should be reported in case it is valued as best estimate plus risk margin. If difficult to project some future cash-flows like collective Future Discretionary Benefits the undertaking shall report the cash flow it effectively uses for calculating the Best Estimate. Other example of complex projection are reinsurance contracts covering multiple lines of business. In this case, allocation of reinsurance cash-flows by line of business should be consistent with the approach followed to unbundle insurance recoverables by line of business.

All cash flows expressed in different currencies shall be considered and converted in the reporting currency using the exchange rate at the reporting date

In case the undertaking uses simplifications for the calculation of technical provisions, for which an estimate of the expected future cash-flows arising from the contracts are not calculated, the information shall not be reported ~~only in those cases where more than 190 % of total technical provisions have a settlement period longer than 24 months.~~
