

## IORP Stress Test 2025 Clarification on the Stress Test templates

EIOPA identified some issues in the published version (v.05) of the reporting template. The issues are confined to the validation rules contained in the “Status of the Template” tab.

The issues do not impact the quantitative and qualitative information provided by the participants in the other tabs and they are not blocking the submission. The only effect of the inaccurate validation rules is to potentially generate unjustified “warnings” in the validation tab and subsequent need to provide justifications. Please ignore the false “warnings” if that is the case.

### Validation rules impacted

16, 28, 29, 30, 31, 32, 33.
