| Company name: | HSBC Securities Services |  |
| Disclosure of comments: | Please indicate if your comments should be treated as confidential: | Public |
|  | Please follow the following instructions for filling in the template: <br> $\Rightarrow$ Do not change the numbering in the column "reference"; if you change numbering, your comment cannot be processed by our IT tool <br> $\Rightarrow$ Leave the last column empty. <br> $\Rightarrow$ Please fill in your comment in the relevant row. If you have no comment on a paragraph or a cell, keep the row empty. <br> $\Rightarrow$ Our IT tool does not allow processing of comments which do not refer to the specific numbers below. <br> - Certain rows represent a group of cells with similar information (ex : TP - E3- cells A17-A31-J16 for a given triangle in TP-E3) <br> - Cells that refer to formulas are not mentioned in specific rows; in case you have comments on formulas, please make them in the cell "general" for the given template <br> - In spreadsheets \& LOGs, certain cell number may seem like they are missing (ex : going directly from cell B1 to cell B3); this is normal, as they may refer to a previously existing cell that has been deleted during informal consultations, and cell numberings have not been changed for interal consistency purposes <br> - If your comment refers to multiple cells or paragraphs, please insert your comment at the first relevant paragraph and mention in your comment to which other cells or paragraphs this also applies. <br> - If your comment refers to subparagraphs or specific cells within a group, please indicate this in the comment itself. |  |
|  | Please send the completed template, in Word Format, to |  |

| :---: | :---: | :---: |
|  | cp009@eiopa.europa.eu. Our IT tool does not allow processing of any other formats. <br> The numbering of the paragraphs refers to this Consultation Paper, the numbering of cells refers to the accompanying spreadsheets and LOGs, the reference to "General", "Purpose", etc. refers to summary documents. |  |
| Reference | Comment |  |
| General Comment | The objectives of raising this feedback are to: <br> 1) Highlight areas of asset data inconsistency, and shortfalls in required asset data content, that we anticipate will need to be resolved if Solvency II reporting is to achieve the regulatory objectives. <br> 2) To suggest proposals to overcome these specific data content challenges and to provide lead time for the shortfalls to be resolved. <br> 3) Prevent the expense and delays that would result from subsequent re-design or rebuild of the asset data content infrastructure in support of Solvency II. <br> 4) Avoid unnecessary costs to the industry by supplying market data only from those sources that are necessary and appropriate to achieve the regulatory objectives. <br> Background <br> Third Party Administrators (TPAs) have responsibilities for managing the asset data content on behalf of Insurance firms (along with the rest of the buy-side including Fund Managers, Pension funds and Hedge funds). Many large Insurance firms have outsourced their Fund Administration to TPAs. <br> Data consistency between TPAs needs to be addressed for some specific gaps and differences |  |

|  | Comments Template on Draft proposal for Quantitative Reporting Templates | Deadline <br> 20 January 2012 <br> 12:00 CET |
| :---: | :---: | :---: |
|  | relating to data content. For example where an Insurer has their assets administered by more than one TPA the data within Solvency II reports and results needs to be consistent. There is also potential that data supplied by TPAs in QRTs (Pillar 3) could be used within Internal/Standard models (Pillar 1). <br> The future crossover of the resulting data content to Pension Funds and also other regulations (e.g. AIFMD, MIFIR, FATCA, UCITS) provides additional impetus to get these areas of data content standardised and agreed. <br> Comments have been included in this comments template next to cells <br> Assets - D1 - cell A8 <br> Assets - D1 - cell A15 <br> Assets - D1 - cell A17 <br> Assets - D1 - cell A24 <br> Assets - D2O - cell A32 <br> Assets - D4 - cell A1 <br> Assets - D6 - cell A20 <br> The comments also relate to other cells and that has been indicated. |  |

## Draft proposal for Quantitative Reporting Templates

Deadline
20 January 2012
12:00 CET

Assets - D6 - cell A5
Assets - D6 - cell A7
Assets - D6 - cell A27
Assets - D6 - cell A28
The Solvency II requirement is to have "Issuer/Counterparty" and their respective "Ultimate Parent" and an "Issuer code" to identify them by (specified in QRTs as Issuer Name, Issuer Group (Code), Counterparty ID and Counterparty Group (Code)).

- Solvency II reporting represents the first occasion when Issuer data is included in industrywide (cross-organisation, cross-jurisdiction) regulatory reporting. Currently each firm manages the data on a micro/silo basis using one of four data vendors. As a result there are differences and inconsistencies that have not been exposed previously
- Issuer information must be consistent across all Solvency II reporting from all firms and all countries because otherwise any analysis of systemic risk, at an aggregate level, would not be accurate and the data differences could not be detected easily.
- The challenge is that the existing Issuer data vendor sources produce different results for issuer and ultimate parent data for the same securities. This means that firms may generate different Solvency II reporting results for the same security unless the different data vendor sources converge fully to become $100 \%$ consistent before the January 2014 live date.
- The error rate, based on a sample of 22 held securities in two very large holding companies, ranged between $5 \%$ and $18 \%$ for Issuer data and between $9 \%$ and $41 \%$ for Ultimate Parent data. We believe these differences could result in material differences to Solvency II reports and results.
- Initial analysis indicates that although the data vendors have quite different structures and sources, most of the data content consistency required for Issuer and Ultimate Parent data could be achieved through more rigorous and consistent data cleansing (by the data vendors) as opposed to structural changes.
- The LEI (Legal Entity Identifier) that is being delivered via Dodd Frank could serve to engender some convergence of issuer data between vendors over time however the definition of the hierarchy linkage between issuer and ultimate parent is unlikely to be in scope.

|  | The link between Pillar 3 and Pillar 1 also needs to be considered given that stock selection (Pillar 1) is likely to be based on front office data sources which could be sourced from a different vendor. <br> Proposal: <br> A consistent quality standard for Issuer data needs to be stipulated for Solvency II in order to meet the data quality requirements of completeness, accuracy and appropriateness. It will be necessary for all existing data vendors to provide data content that is identical and standardised in order to become Solvency II compliant. |  |

Accurate cross-country analysis for EIOPA will only be possible if all assets are reported using the identical CIC. If the CIC is not consistent across the industry then consolidating information will be extremely challenging and require significant effort and judgement to accurately reconcile and aggregate. <br> An existing precedent is the CFI (Classification of Financial instruments - ISO 10962) which uses a similar formula to the CIC but delivers inconsistent results because the codes are sourced from three numbering agencies that are able to make their own differing interpretations for the same |  |

| :---: | :---: | :---: |
|  | asset. CIC uses a very similar formula to the CFI so the same inconsistency will be inevitable unless a single central global numbering agency can be appointed. <br> CIC administration and assignment will be a much more complex task than for ISIN/Sedol/Valoren codes because the CIC requires detailed assessment of the type of instrument. There are likely to be different categories of CIC e.g. <br> i) possible to assign centrally by numbering agency (market assets such as equity, bond, exchange traded derivatives and new CCPs for OTC derivatives); <br> ii) might require additional information from Fund Manager to numbering agency (Collective Funds); <br> iii) makes no sense to manage centrally (e.g. bi-lateral OTC derivatives, segregated funds) <br> A uniform code for identifying securities would appear to be within the objectives of Solvency II, since it would help to draw comparisons and to identify cases where specific insurance groups had significant risk exposures. It could also help to identify risk exposures from investments within Europe as a whole, which is relevant to financial stability. <br> In order for any proposed standardisation to be effective our view is: <br> It will be necessary for EIOPA or The European Commission to create or appoint a numbering agent for CIC, and enforce the use of the identical code for all firms. <br> - A single global numbering agency would also need to be appointed so that there are consistent CICs for each asset that can be distributed identically. <br> - Cross-referencing to ISIN codes would provide the means to deliver the accuracy and data integrity within Solvency II data reporting systems. <br> We would be grateful for clarification from EIOPA on whether they expect CIC to be consistent across the industry, in order to achieve the required results. |  |

## Comments Template on

## Draft proposal for Quantitative Reporting Templates

Deadline
20 January 2012
12:00 CET

- Other (O): otherwise, split using the "global equity" (if fund invests only in EEA or OECD) or the" other equity" as prescribed under the QIS 5 exercise."

This gives rise to a number of challenges;

- Currently look through data is time delayed by several months and is distributed on a limited scale bi-laterally using templates
- The source of the look-through data can be three or more administrative organisations 'away' from the insurance firm, for example funds holding collectives or pooled funds. The number of organisations involved in sourcing the look-through data, many of which will be far removed from the top level insurance firm.
- The fragmented source of look-through data puts the accuracy, completeness and appropriateness of the final compiled data set at risk.
- Investment managers do not provide look-through data for collective funds as it breaches their strict disclosure rules; Solvency II requires a significant cultural shift amongst investment managers.
- Investment managers will need to provide (or permit provision of) details of all holdings and their weightings (not normally published other than top 10) and over-ride any privacy concerns.

## Proposal

- To address Investment manager concerns relating to disclosure of look-through data for collectives, the insurance firm (or elected TPA) could aggregate holdings by CIC across all assets for Pillar 3 reporting. For Pillar 1 for some (but not necessarily all) firms the full transparency of look through constituents and holdings is likely to still be necessary.
- To address concerns relating to obtaining look-through data in a timely manner, consider the use of a proxy, such as the benchmark for a collective (relevant to public indexes for non synthetic funds), in the case of the holding in the collective not being material to the insurance firm's overall assets (consistent with the Mandate method).
