

Curriculum vitae of Mariusz Smętek

Mariusz Smętek has 24 years of experience in supervision over insurance market. Since 2010 he worked as a Deputy Director or a Director of various departments in the Insurance Supervision Division of the KNF – Polish Financial Supervision Authority. Since the beginning of 2020 he is the Director of the Insurance Supervision and Risk Monitoring Department (off-site supervision, group supervision, risk & solvency monitoring incl. risk assessment framework, supervisory reporting and financial statements, insurance databases & supervisory tools, supervising insurance distribution through agents and brokers).

His area of main interest includes stress testing, ratings, financial analyses, early warning systems, insurer's databases and reporting, econometrics, modelling and forecasting of financial markets.

In this capacity he led many projects improving the quality of supervision in Poland by developing the methods and tools for supervisors and insurance undertakings. He was responsible i.a. for elaboration of assumptions, development and implementation of Early Warning System, methodologies for the stress-testing, principles of ratings and financial analyses of insurance companies, analyses of insurance sector, reporting of insurance companies, gathering and processing of data, automation of the process of supervising insurance undertakings, dealing with IT systems and creating advanced analytical tools.

Since the establishment of EIOPA he has been an Alternate Member of the Board of Supervisors and in the years of 2016-2019 a Member of the Risk and Financial Stability Committee.

Mariusz Smętek has also shared his experience, as a short term expert, during the projects for: the Bulgarian, Russian and Moldavian insurance supervisory authorities in the scope of insurance reporting, financial analyses and analytical tools. He is co-author of two books on financial analysis, numerous journal articles and conference papers.
