<p>Please send the completed template, in Word Format, to CP-13-010@eiopa.europa.eu. Our IT tool does not allow processing of any other formats.</p> <p>The numbering of the paragraphs refers to this Consultation Paper, the numbering of cells refers to the Technical Annexes II and III.</p>		
Reference	Comment	Resolution
General Comments	<p>Assuralia welcomes the opportunity to comment on the Consultation Paper on Proposal for Guidelines on submission of information to national competent authorities.</p> <p>In general, the proposed reporting requirements to National Competent Authorities (NCA's) before Solvency II starts, are burdensome. In order to reduce the reporting burden, the narrative reporting requirements should be lowered if not abolished.</p> <p>If EIOPA decides to take this reporting requirements further, certainty is in that case needed that the templates will be robust and not altered once the Guidelines have been published and that there will be no changes thereafter, not even after the preparatory phase. The fact that EIOPA intends to revisit the reporting requirements during 2013 creates a huge uncertainty and possible extra costs as undertakings have to start preparing now.</p>	

	<p>On the connection to Pillar I Solvency requirements, the Guidelines are very ambitious. Guidelines require Pillar I calculations to be carried out reflecting the final Solvency II position. In our view it is critical requiring the complete Pillar I calculation while the legislative process is not completed.</p> <p>Implementing a new solvency framework is a demanding and time-consuming task requiring a lot of resources, especially for smaller undertakings.</p> <p>Also, if only 50 % of the market share has to submit quarterly information, the other 50% is not gradually preparing for the quarterly reporting. This may cause additional problems when Solvency II effectively enters into force. From a cost perspective, the combined implementation of quarterly reporting and interim reporting processes may be more efficient.</p> <p>We also question the benefits of group reporting at this stage. Different approaches to solo reporting between countries and the fact that not all solo entities are required to report will complicate the group consolidation.</p> <p>In order for undertakings to prepare them properly for the reporting requirements, it is key that EIOPA publishes as soon as possible the relevant or basic risk-free interest rate term structure.</p>

	Although undertakings applying for internal model approval do indeed have to provide data relating to both their models and the standard formula, they will not be geared up to report standard formula data using the specific templates.	
1,13	Preparing systems to populate such templates when good progress is being made with the internal model application process would be an extra and unnecessary burden. Further, the requirement to complete such templates goes against what has been set out in the stabilised package, i.e. that these QRTs (SCR-B3 series) are intended for standard formula undertakings only.	
1,14	(See general comments) The narrative reporting should be excluded from the preparatory phase. It is not only overly burdensome; it also risks to double the workload. Since Solvency I still applies during the interim period, undertakings will have to submit information on Solvency I reporting as well as Solvency II reporting.	
1,15	We support EIOPA's proposal that the information to be reported be a subset of the full package, not the package in its entirety. However, further analysis is needed as some templates such as TP-E1 and TP-F1 may need more detailed information derived from other Life and Non-life templates to be fulfilled.

Section I. General Comments		
1,26		
1,27		
1,28		

Section	II. General	
Comments		
1,29		
1,30	Thresholds cover 80% of national market share for annual information and 50% for quarterly information when the ECB would in principle cover 80% of the quarterly statements for its own reporting. Harmonization between the two should be achieved and the use of own simplification for quarterly reporting should be permitted	
1,31		
1,32		
1,33		
1,34		
1,35	Notification of insurance and reinsurance undertakings falling into the predefined thresholds should happen as early as possible such that concerned undertakings are timely informed and able to prepare themselves adequately. A notification by the NCA 11 months before the initial submission reference date is considered to be too late.	
1,36	Preparatory Guidelines should be limited to the solo perspective only. If requirements for groups are introduced the thresholds should be consistent with those applied to solo entities. The market shares provided for in Guideline 6 should not be undermined.	
1,37		
1,38	see 1.35	
1,39		
1,40	See 1.35 – this notification ought to be made much earlier: the relevant data currently exist for this. The same notification date should apply also to 1.38	
1,41	Preparatory Guidelines should be limited to the solo perspective only. If requirements for groups are introduced the thresholds should be consistent with those applied to solo entities. The market shares provided for in Guideline 6 should not be undermined.	
1,42		
1,43		
1,44		
1,45		

1,46	(See general comments & paragraph 1,14) If narrative reporting is required, it should only be required at group level, not at solo level.	
Section III. General Comments	For supervisors to have a good understanding on the composition of the Solvency Capital Requirements, undertakings should also provide some information on the application of the look through approach.	
1,47	It is not clear why the Best Estimate of technical provisions at solo annual level is required by country? The calculation per country is much more detailed and burdensome. It is proposed that the calculation of the technical provisions as a whole should be sufficient.	
1,48		
1,49		
1,50		
1,51		
1,52	(See general comments) It is critical requiring the complete Pillar I calculation while the legislative process is not completed. If the legislative process is not completed, Pillar I elements cannot be part of the preparatory reporting.	
1,53		
1,54		
1,55		
1,56		
1,57		
1,58		
1,59	See general comments on group's reporting and on reporting of Pillar I calculations.	
Section IV. General Comments	See general comments on narrative reporting	

1,60	If the purpose of these Guidelines is to assess progress towards achieving compliance with SII requirements, spending time and resources producing narrative that describes a temporary situation (temporary, because undertakings will be in the course of making progress towards achieving compliance) seems unduly burdensome. We believe that NCAs will be able to assess progress towards Pillar II compliance via the means proposed for the System of Governance. We therefore do not believe the Guidelines proposed on the narrative reporting are necessary.	
1,61		
1,62		
1,63		
1,64	"Any other material information" is very vague and should be clarified by EIOPA.	
1,65	If groups provide a narrative reporting on governance, fit & proper, risk management and the internal control system, it seems unnecessary to require an additional narrative reporting on these aspects for each of group subsidiaries. Therefore, it is proposed to drop the narrative reporting requirement for subsidiaries if the group provides a complete narrative reporting on these elements.

Section V. General Comments		
1,68		
1,69		
Section VI. General Comments		
1,70		
1,71		
1,72		
1,73		
1,74		
1,75		
1,76		

1,77		
Section VII. General Comments	EIOPA and NCAs need to allow for the fact that any policy or documented process might not be fully operational as at the time of implementing these Guidelines.	
1,78	The relevance of a guideline on a description of the reporting processes themselves during the interim period is seriously questioned. This relates to the internal controls of the reporting processes and not really with the reporting itself anymore. Since requirements on the internal control system already are included in the interim measures relating to the system of governance, it is proposed to drop this guideline here.	
Section VIII. General Comments		
1,79	During the interim period undertakings will be required to report Solvency II figures in addition to the Solvency I figures. A reasonable period of time should be foreseen for undertakings to prepare these additional reports. It is proposed to extend the reporting deadline of the annual figures of 20 weeks with at least 5 more weeks.	
1,80		
1,81	The extension of the deadline (6 weeks) for quantitative group reporting should also hold for quantitative solo reporting (see comment paragraph 1,79). The extension of the deadline (6 weeks) for quantitative group reporting should also hold for qualitative group reporting (narrative reporting) (see comment paragraph 1,82).	
1,82	In order to avoid inconsistent application of the guidelines it should be indicated that the reporting of the qualitative information should be submitted within the same time constraints but not before the reporting of the related quantitative information. As such, an extension of the submission deadline for the quantitative part should result in an extension of the submission deadline of the qualitative part.	
Section IX. General Comments		
1,83		
1,84		
1,85		
1,86		
1,87		

1,88	The extensive data checks will increase the workload and costs for the undertaking. Automatically built-in data checks would relieve the workload and therefore would be much appreciated.

TP-F1Q- Comments	General	Can the quarterly templates have the same lay-out as the annual templates? For example TP-F1 needs to be provided on yearly basis while TP_F1Q is required on quarterly basis. The content of the TP-F1Q is however reduced. Can we use the TP-F1 template to report the quarterly figures?
