

# Cyber Risk for Insurers - Challenges and Opportunities

DOCUMENT

DATE:

01 Sep 2019

As cyber threats have become more prominent in recent years, they are increasingly considered as a top global risk for the financial sector and the economy as a whole. The increasing frequency and sophistication of cyber attacks, the fast digital transformation and the increased use of big data and cloud computing make insurers increasingly susceptible to cyber threats.

This report provides new information about cyber risk for the European insurance sector, both from an operational risk management perspective and an underwriting perspective.
