

The pilot dashboard on insurance protection gap for natural catastrophes

DOCUMENT

DATE:

04 Dec 2020

This is the first pilot dashboard which depicts the insurance protection gap for natural catastrophes. The aim is to represent the drivers of a climate-related insurance protection gap in order to identify measures that will help in decreasing society's losses in the event of natural catastrophes.

Find below the consultation documents, as well as contributions received following the consultation period and a summary feedback statement.

EIOPA aims to publish a revised version in 2022.
