LOCATION:

Tackling aspects related to sustainable finance, open finance and financial inclusion, this conference addresses what needs to be done to help consumers steer a new path through today's landscape.

These days consumers are faced with existing and new challenges. Digitalisation and sustainability continue to be issues that are changing the way people

approach financial services: either how they do business or the choices and preferences that they make. On top, there is a new challenge - increasing costs of living impact the choices that consumers have to make.

You can attend the event in person in Frankfurt am Main, Germany, or you can follow on-line.

The event is organised jointly by the European Banking Authority (EBA), the European Insurance and Occupational Pensions Authority (EIOPA) and the European Securities and Markets Authority (ESMA).
