

## Curriculum Vitae – Dieter Hendrickx

Dieter Hendrickx is currently the head of *prudential policy insurance* at the National Bank of Belgium (NBB). He holds an MSc degree in Business Engineering and an MSc degree in Financial and Actuarial Engineering from the Catholic University of Leuven, Belgium.

He joined the Operational Supervision Department of the former CBFA (later: NBB) in April 2010, after having worked for close to four years in the Value and Risk Management Department of a large bancinsurance group in Belgium. As operational supervisor, he was the prudential file manager for several international insurance groups active in Belgium.

In January 2012, he moved to the Policy and Financial Stability Department of the NBB, where he was an adviser on Solvency II related policy issues and responsible for conducting stress tests and financial stability analyses for the Belgian insurance sector. In this context, he has also been involved in several international working and project groups at the level of EIOPA, ESRB and IAIS including leading roles such as Vice-Chair of the EIOPA Financial Stability Committee from September 2013 till April 2016.

From May 2017 till October 2018, he was seconded as a Financial Stability Expert to the secretariat of the European Systemic Risk Board, where he was leading the work on all insurance-related macroprudential matters, in particular the ESRB workstream on macroprudential instruments for insurance.

In November 2018, he was appointed as head of *prudential policy insurance* at the NBB. At the same time, he was also nominated as (voting) alternate to the EIOPA Board of Supervisors. In November 2019, he was appointed as the Chair of the IAIS Macroprudential Monitoring Working Group.
