cp009@eiopa.europa.eu. Our IT tool does not allow processing of any other formats.

The numbering of the paragraphs refers to this Consultation Paper, the numbering of cells refers to the accompanying spreadsheets and LOGs, the reference to "General", "Purpose", etc. refers to summary documents.

Reference	Comment	
General Comment	The LOGs and summary documents do not clearly identify the currency in which the QRT's should be reported in. The preference is to report templates in the entity's reporting currency, however more guidance would be most useful.	
3.1	The general reporting requirements does not clearly define the term quarterly. It is not evident from the consultation papers whether a quarter means a calendar year quarter, or the quarter end of the reporting entity. The assumption and preference is that it implies the quarter end of the reporting entity, and for annual reporting, the year end of the reporting entity, however more clarity in this regard will be useful.

Country - K1– General	The template notes that the localization of country should be based on where the business is underwritten. More clarity could be given as to whether this refers to the physical place of underwriting, or under which country policies are issued. As an example, Company A could underwrite all policies in London. The company however has a branch in Japan through which it

	<p>The disclosure of expected profit in future premiums seems to be a duplication of what is disclosed under the reconciliation reserve. Perhaps it would be better to disclose EPIFP as a component of the reconciliation reserve rather than as a separate disclosure. Guidance on how EPIFP will be determined will also be useful.</p> <p>In any case it seems to be overly burdensome on the insurer to have to provide this disclosure on a quarterly basis.</p>

VA – C2B – Frequency		
VA C2B - cell AA2		
VA C2B -cell A1	Interest received is required to be disclosed on a received basis and not an accrued basis. This is counter intuitive to the balance sheet requirements and the investment reporting requirements. Per D1, the total Solvency II amount includes accrued interest. Assets reported under D1 will reconcile back to assets as reported in C1 balance sheet. As such, when the roll forward of investments is performed in the VA C2B, there is no cell where the movement in accrued interest is reported.	
VA C2B -cell A2	Refer to VA C2B Cell A1 above	
VA C2B -cell A3	Refer to VA C2B Cell A1 above	
VA C2B -cell A4	Refer to VA C2B Cell A1 above	
VA C2B -cell A6		
VA C2B -cell A7		
VA C2B -cell A8	Split seems to be too granular, and it is thought that it would be more appropriate to add cell A6 and cell A8 together, as under a FVTPL (IFRS) valuation , these amounts are typically not disclosed separately.	
VA C2B -cell O1	Refer to VA C2B Cell A1 above	
VA C2B -cell O2	Refer to VA C2B Cell A1 above	
VA C2B -cell O3	Refer to VA C2B Cell A1 above

VA C2C -cell AA5		
VA C2C -cell A1	<p>The definition is unclear on premium receipts – actual cash flows, Does this include reinsurance premium paid for risks accepted during the current period as it does not seem to be stated elsewhere..</p> <p>The definition could furthermore be expanded as it is unclear whether premiums received in advance in respect of policies bound but not incepted should also be reported here</p>	
VA C2C -cell B1		
VA C2C -cell C1	Certain insurers do not record claims to such a detail as to report salvage and subrogation recoveries separately. The requirement seems overly burdensome.	
VA C2C -cell D1		
VA C2C -cell E1	The definition is unclear. Does the BE accepted during the period include BE for policies bound but not yet incepted, or does it relate only to on risk / incepted policies?	
VA C2C -cell E1A	Definition is unclear. Does TP as a whole mean the balance of all other movements in current period technical provisions i.e. reported estimates?	
VA C2C -cell G1

MCR - B4A- cell C2	A more in depth explanation of net written premium would be helpful. Will net written premiums correspond to net written premium used in the stat accounts (ie premium written and incepted during the period) or does net written premium include Solvency II items such as premiums for contracts that have been bound, but for which the coverage period have not incepted.

Assets – D1 – Quarterly Exemption	<p>The possible exemption for quarterly templates is currently unclear and it would be helpful if more guidance could be added with examples of how the definitions are applied.</p> <p>Furthermore, if an entity is exempted from reporting D1 quarterly, would that then mean that</p>	

**Comments Template on

12:00 CET**

	an entity that qualifies for the quarterly exemption of the balance sheet will not meet that requirement anymore if it elects not to report D1Q (due to the fact that the reconciliation reserve is not sufficiently explained)., or is the assumption that reporting cells A9 to A9F and cells A10A and L16 will sufficiently explain the reconciliation reserve on the assets side?

As such, would it not be more appropriate to delete this field from the quarterly template?</p>

Assets - D2T- Frequency	It seems overly burdensome to require closed derivative positions on a quarterly basis and it is thought that it would be more useful to provide this data on an annual basis instead as this would give a clearer picture of derivative positions for the period, and would be in line with the frequency how D3 (investment income) is reported.	
Assets – D2T– Quarterly Exemption	The possible exemption for quarterly templates is currently very unclear and it would be helpful if more guidance could be added with examples of how the definitions are applied.

Assets – D4 – Quarterly Exemption	<p>The definition of cash and cash equivalents in C1 cell A27 seems overly restrictive, As such, many short term, low risk funds (MMF) will be included in the investment portfolio, increasing the percentage of funds in excess of 20% of the total portfolio. If certain funds such as UCITS, MMF could be included in the definition of cash and cash equivalents, more firms would be able to make use of the quarterly exemption for look through of funds. Alternatively, the applicable funds used to calculate the 20% criteria for quarterly exemption could be limited to exclude funds of a cash nature.</p> <p>In any case, the requirement to provide a look through disclosure of funds seems overly burdensome, especially on a quarterly basis and will place undue burden on insurers and asset managers to produce information which will be costly to come by and could potentially lead to delays in the reporting of the required data.</p>

TP -E1- cells A14-L14	We will be grateful for more detailed guidance on the definition of claims provisions. In particular, does claims provisions include premiums due relating to claims that have already occurred (in other words premium receivable), or should these amounts be included in the premium provisions amount. Including these amounts in the premium provision seems to be counter intuitive, as premium provision relates to claims events occurring in the future. As an alternative, these amounts can just stay as a premium receivable balance on the face of the balance sheet and not be included in the technical provisions figure., although these are future cash flows to be received.

Re - J3- General	<p>It seems to be overly onerous to require the disclosure of reinsurance recoverables by reinsurer. Potentially a very large amount of reinsurers over a number of policy years could be required to be disclosed. It is also unclear how to tread Lloyds reinsurers ie. Should Lloyds be one single reinsurer, or should Lloyds be further broken down into the syndicates that reinsures the risk.</p> <p>Instead of disclosing the required information by reinsurer, would the IFRS disclosure by credit rating not be more appropriate?</p>
